### Financial Highlights

Half-Year ended	31 December 23	31 December 22	Var. %
Average FuM (A\$b)	16.2	17.8	(9.1)%
Average Fee (bps)	114	112	1.8%
Fee Revenue (A\$m)	92.4	99.3	(6.9)%
Expenses (A\$m)	48.1	48.2	(0.2)%
NPAT (A\$m)	35.6	37.6	(5.3)%
Underlying profit* (A\$m)	37.3	39.8	(6.3)%
Interim Dividend (cps)	6 cps	7cps	(1 cps)

- Fee revenues decreased 6.9% largely due to 9.1% decrease in average FUM. Partly offset by an increase in average fee bps
- Costs kept flat on the previous period despite one off project costs and inflationary pressures
- Underlying profit\* down 6.3%, similar to NPAT with gains on seed investments being relatively small in both halves
- Fully franked dividend of 6c

Source: Platinum. Results are for the 6 months ended 31 December 2023 and variances are to the previous corresponding period ended 31 December 2022.

\* Underlying profit excludes mark-to-market gains and losses on seed investments and non cash amortisation of performance rights granted under the Platinum Partners' Long-Term Incentive Plan ("Platinum Partners' LTIP") (all net of tax).

### Equal weighted index – an alternate measure for stock picking

Look at the difference: MSCI AC World Index vs the MSCI AC World 'Equal Weighted' Index\*

Platinum's exposure is more aligned to the equal weighted index

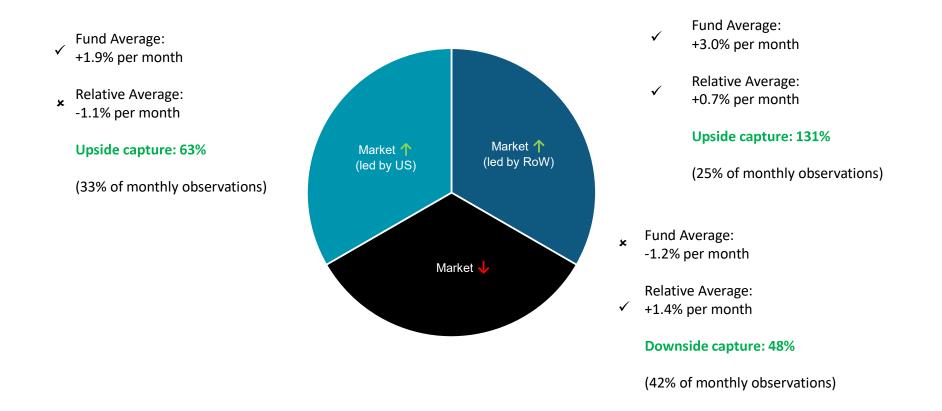

Source: MSCI AC World Index Fact Sheet – January 2024, https://www.msci.com

9 \* The MSCI equal weighted index offers an alternative to market capitalisation weighted indices. Equal weighting holds the same dollar value in each stock in the index, representing an equal weighting in the portfolio. Thus, the performance of each stock carries equal importance in determining the total value of the portfolio. It therefore avoids concentrating too much of the portfolio into a few large stocks.

### Market conditions

#### Global equity markets fall into three phases\* (returns and upside/downside capture measured from 1999 to 2023)

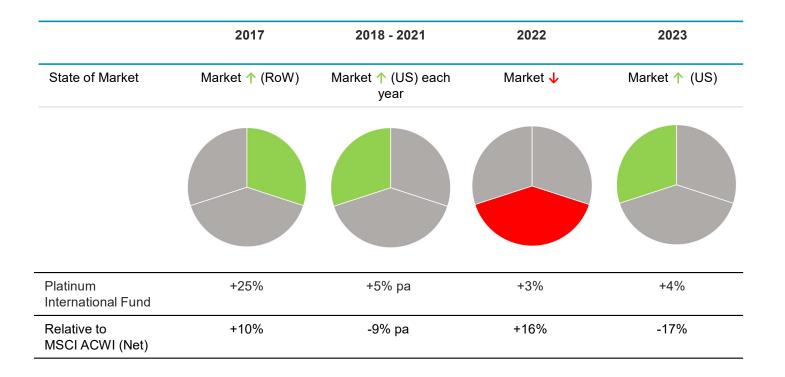

Source: Platinum for "Fund Average" and upside/dpwnside capture data and FactSet Research Systems for "Relative Average" data. Figures have been calculated for the period 1 January 1999 to 31 December 2023, using 300 months\* The "Fund Average" represents the average returns of the Platinum International Fund over the period. The "Relative Average" represents the difference between the average returns of the Platinum International Fund and the average returns of the MSCI AC World Net Index (\$A) over the period. The "Fund Average" returns have been calculated using the NAV per unit of C Class units, are after fees and costs and assume the reinvestment of distributions. Past performance is not a reliable indicator of future returns.

### Recent history

#### Platinum's outcomes have been consistent across market phases

Source: Platinum for fund returns and FactSet Research Systems for index returns. The Fund's returns have been calculated using the NAV per unit of C Class units, are after fees and costs and assume the reinvestment of distributions. The index referenced is the MSCI AC World Net Index (\$A). Years are calendar years i.e. 1 January of the relevant year to 31 December of the relevant year. Past performance is not a reliable indicator of future returns.

The PIF returns are the extracted gross long book returns in AUD i.e. they do not include the effect of fees and costs nor cash and short positions. Caution should be used when relying on these returns. PIF returns are calculated by dividing the contribution % by the average weight %, multiplied by 100. Index returns are in AUD and represent the returns of the net indices. The relative performance is the difference between the PIF return and the index return. Past performance is not a reliable indicator of future returns.

Returns are calendar year returns for each calendar year from 2000 to 2023. PIF returns are the gross returns of the long positions in the PIF portfolio calculated in AUD – i.e. they do not include the effect of fees and costs nor cash and short positions. Caution should be used when relying on these returns. Index returns are the returns of the gross index. Past performance is not a reliable indicator of future returns.

### Platinum can help you mitigate portfolio risk

- 1. Lower volatility than the MSCI AC World Index.
- 2. Low correlation with the MSCI AC World Index.
- 3. Completely **different portfolio** to growth managers and the index.

#### Volatility reduced via blending the Platinum International Fund with the MSCI AC World Index

\* Underlying profit was restated in the current period to exclude non-cash share based payment expense on the Platinum Partners' LTIP grants.

\*\* Share-based payment expense on Platinum Partners' LTIP includes expenses relating to rights that have lapsed due to not meeting TSR hurdles for FY22 and FY23. In accordance with accounting standards, Platinum continues to record a share-based payments expense for those lapsed rights even though it is certain that no shares will be issued. Further, any rights that vest in the future are currently expected to be settled by the issue of new PTM shares rather than purchased using cash.

Profit After Tax Attributable to Owners	31.9	36.3	(12.1%)
Average FuM	16,184	17,803	(9.1%)

- Funds management revenue was down 6.9% primarily due to the 9.1% decrease in average FuM.
- Expenses decreased 0.4% due primarily to decrease in staff costs which was offset by higher non-staff expenses.
- Share-based payment expenses increased in the half year ended December 23 due to an additional grant of deferred rights under the Platinum Partners' LTIP

#### **Investment and other**

Total	8.3	15.6	14.4	14.1	12.2	11.8

Notes:

1. Amortisation profile includes existing grants as at 31 December 2023 plus an estimate of the final 2024 grant. Actual expenses in 2024 to 2028 will also include share-based payment expense for grants made in those years (if any).

2.Deferred Remuneration Plan: vesting is conditional on continuous employment for a period of four years from the date of grant. Amortisation profile includes an estimated forfeiture rate.

3. Platinum Partners Long Term Incentive Plan: vesting is conditional upon meeting minimum total shareholder return ("TSR") performance hurdles. Each award is divided into four tranches with one quarter of the award being tested against the TSR hurdle at the end of each year for four years. The exercise of deferred rights that have vested is also subject to an eight year continuous service condition. Amortisation profile includes an estimated forfeiture rate.
