ASX Market Announcements
Australian Securities Exchange Limited
Sydney NSW 2000

Monthly Net Tangible Asset Update

The unaudited **pre-tax** net tangible asset (**pre-tax NTA**) backing per share of Platinum Asia Investments Limited (**PAI**) as at 31 March 2021 was \$1.3471 per share (as at 28 February 2021 it was \$1.3816).

The unaudited **post-tax** net tangible asset (**post-tax NTA**) backing per share of PAI as at 31 March 2021 was \$1.2753 per share (as at 28 February 2021 it was \$1.2974).

The NTA was calculated in accordance with Australian Accounting Standards using the last sale price to value investments. Investments were stated at market value and for the post-tax NTA, after provision for tax on **both** realised and unrealised income and gains.

At 31 March 2021, the PAI share price was \$1.27.

The 31 March 2021 monthly update for PAI is attached to this announcement. For more information in relation to PAI please refer to the website at:

MARKET UPDATE AND COMMENTARY

- China seeing very strong export growth and officials trying to talk down any exuberance.
- We added to Chinese property developers amid industry reform.
- We have trimmed semiconductors and Indian exposure.

The month of March saw Non-Japan Asia equity markets and the portfolio decline slightly, amid US dollar strength and a pause in the ascent of commodity prices such as crude oil and copper.

China growing but officials talking down the economy

Chinese monetary officials continue to send sobering signals to the market. Guo Shuqing, chairman of the China Banking and Insurance Regulatory Commission, warned in February of speculative excess in US and European markets, and spoke of “[reducing] the high leverage within the financial system” (Source: Ollari Consulting). Given the strong rebound in global demand, and hence for Chinese exports, this is not surprising. During March data was released for February’s Chinese exports. These were up 60.6% versus a year ago, which is clearly affected by the baseline comparison and seasonality: still, the figure was nearly double consensus expectations (Source: Bloomberg, Ollari Consulting).

China’s economy continues to expand, as indicated by Purchasing Managers’ Index (PMI) data for March. The official manufacturing PMI came in at 51.9 and non-manufacturing was 56.3 (Source: Bloomberg). China’s official PMI surveys larger firms and skews more toward the state-owned sector. The Caixin China General Manufacturing PMI, which surveys smaller and more privately-owned firms, indicated a slower expansion with a reading of 50.6, while the non-manufacturing figure was robust at 54.3 (Source: Caixin Global). Readings above 50 in PMIs indicate expansion.

Our interpretation of Chinese economic data is that the economy is slowing from its rapid ascent in its reopening phase and that officials are attempting to curb enthusiasm about the immediate future, particularly in the presence of rapidly accelerating external demand as the US and European economies reopen.

Adding to property developers

We reduced exposure during March, we added to Chinese property developers namely **China Vanke** and **China Resources Land**, which join fellow developer **China Overseas Land & Investment** in the portfolio. Investor sentiment toward the sector is negative, with the market appearing to believe that increased regulatory scrutiny on debt levels and home price limitations will hamper the profitability of developers for years to come. We see significant potential for consolidation, with higher quality operators with stronger balance sheets poised to benefit in our view.

During March it was announced that 22 cities in China would adopt a new policy to conduct land auctions for property development in three short windows each year (Source: South China Morning Post). This will require more capital in short periods of time for property developers and may lower land prices – both would be beneficial to the larger property developers, we believe. Moreover, our work indicates the property developers are trading at close to record low valuations – on low single digit price-to-earnings ratios in many cases. This is an attractive starting point.

Trimming semis and India

We have continued to trim our holdings at the margin in semiconductor names **Samsung Electronics**, **SK Hynix** and **Taiwan Semiconductor Manufacturing** into strength, with this theme playing out in excess of our expectations. Signs of a global chip shortage include recent news from Nissan that it will idle production at three North American plants in response to the global chip shortage for vehicle production (Source: Nissan).

Daily COVID-19 cases were running at over 90,000 in early April 2021, near the peaks recorded in India in September 2020 (Source: Google data). We see potential for meaningful economic interruption and have trimmed exposure to India as a result. We exited **Reliance Holdings** in recent weeks.
