The unaudited pre and post-tax net tangible assets (NTA) of Platinum Asia Investments Limited (“PAI”) as at 30 September 2016 was \$0.9928 per share (31 August 2016: \$1.0136).

The NTA was calculated on a liquidation basis using the last sale price to value investments. As the calculation has been prepared on a full liquidation basis, any deferred tax asset in excess of the liquidation tax provision has consequently not been recognised. In addition, the NTA figures do not include the effect of any dilution that would arise from the conversion of any unexercised options.

At 30 September 2016, the PAI share price was \$0.945 and the option price (“PAIO”) was \$0.017.

Unaudited additional information:

	30 September 2016	31 August 2016
	(\$ per share)	(\$ per share)
Pre-tax NTA	0.9928	1.0136
Current and unrealised tax provision*	0.0000	(0.0049)
Post-tax NTA	0.9928	1.0087

* If the NTA included the tax impact of prior period losses and costs of the initial public offer, then the 30 September 2016 post-tax NTA, based on application of the accounting standards, would be \$0.9938.

The 30 September 2016 monthly update for PAI is available on the Platinum website at:
