

Opportunity: Investment Analyst

There is no such thing as a typical analyst at Platinum, though we are united by curiosity, a love of business and the simple motivation of creating wealth for our clients. The company proudly thinks differently.

In running global share portfolios from Sydney, our differentiated perspective and our mentality are our edge. The investment team conducts a continuous debate on business, and in doing so, the team is always learning. Anticipating tomorrow's world, by interpreting the facts and observing change are at the heart of the process. Would you like to be involved?

Investment Analysts and Portfolio Managers at Platinum work closely together to identify opportunities due to emerging trends, out of favour sectors and areas seeing significant structural change or growth. Our team is a diverse mix of curious minds with a natural desire to understand how things work. We do not follow the crowd, but apply behavioural principles to markets, layered on a deep understanding of the companies we investigate. This is part art and part science, and means there is no specific background that we seek. In practice, we value real world experience over financial skills (these can be taught). The difference is an investor mindset and a willingness to work with others to deepen knowledge. An ability to absorb the discomfort is essential as is humility, the market can be swift to punish hubris. Your ability to demonstrate intellectual curiosity, integrity, team mindset, resilience and a passion for investing will set you apart.

The role can be deeply satisfying from an intellectual perspective with plenty of autonomy, well rewarded, and has a long runway for personal growth. Investment management is a more rounded and philosophical pursuit than many perceive from the outside.

If you believe your unique curiosity and talents can contribute to the financial wellbeing of Platinum's clients, then we would love to hear from you.

Please register your interest by emailing careers@platinum.com.au with a CV and letter providing some insight as to why this is the case.
