1. Investment returns are calculated using the Fund's unit price and represent the combined income and capital return for the specified period. They are net of fees and costs (excluding the buy-sell spread and any investment performance fee payable), pre-tax, and assume the reinvestment of distributions. The investment returns shown are historical and no warranty can be given for future performance. You should be aware that historical performance is not a reliable indicator of future performance. Due to the volatility of underlying assets of the Fund and other risk factors associated with investing, investment returns can be negative (particularly in the short-term).

2. The investment returns depicted in this graph are cumulative on A\$20,000 invested in the Fund since inception relative to the MSCI All Country Asia ex Japan Net Index in A\$. The investment returns are calculated using the Fund's unit price. They are net of fees and costs (excluding the buy-sell spread and any investment performance fee payable), pre-tax and assume the reinvestment of distributions. It should be noted that Platinum does not invest by reference to the weightings of the Index. Underlying assets are chosen through Platinum's individual stock selection process and as a result holdings will vary considerably to the make-up of the Index. The Index is provided as a reference only.

3. The "Long %" represents the exposure of physical holdings and long stock derivatives. The "Net %" represents the exposure of physical holdings and both long and short derivatives. The "Currency %" represents the currency exposure for the Fund's Portfolio, taking into account currency hedging.

4. Top Ten positions shows the Fund's top long share exposure positions. Long derivative exposures are included, however, short derivative exposures are not. Platinum Investment Management Limited ABN 25 063 565 006 AFSL 221935, trading as Platinum Asset Management ("Platinum") is the responsible entity and issuer of units in the Platinum Asia Fund (the "Fund"). The Platinum Trust Product Disclosure Statement No. 9 and Supplementary PDS ("together PDS") provides details about the Fund. You can obtain a copy of the PDS from Platinum's website www.platinum.com.au, or by contacting Investor Services on 1300 726 700 (Australian investors only), 0800 700 726 (New Zealand investors only), or 02 9255 7500, or via invest@platinum.com.au. Before making any investment decision you need to consider (with your financial adviser) your particular investment needs, objectives and financial circumstances. You should refer to the PDS when deciding to acquire, or continue to hold, units in the Fund.

Market update and Commentary

While recent rises in the US dollar concerned investors who look at the historic correlation between emerging market equities and the world's reserve currency, it is worth focusing on the key driver of our Asia Fund; reform taking place around the region. This month it was the turn of Indonesia to inaugurate reform-focused President Jokowi. Another factor that should not be ignored is the huge benefit populous and growing nations such as India and China could receive from the major reduction in the oil price and the ability of both these large countries to implement more accommodative monetary policy.

With regards to the portfolio, it was the turn of the private-sector Indian banks to take the lead. The market is starting to focus on the potential of the financial sector, as well as broader economic reform in the sub-continent. Meanwhile, lower wholesale funding costs, signs of stabilising credit quality and a pick-up in demand for loans are all positive signs. ICICI Bank is our key investment in this area.

In our September Quarterly Report, Joseph Lai reports on analyst trips he made to China and Vietnam. In the former, he spent time looking at changes in the construction industry. The report also addresses corruption and the property sector. The latter appears to be an interesting "one to watch". He explains some of the positive change in the very cheap market of Korea and notes that the biggest risk from lowly-priced Asia's progress at present seems to emanate from outside.

Over the last year the Fund has continued to move away from SE Asia (ASEAN) which has served investors well and redeployed the proceeds into India and China. The former was built-up in anticipation of a positive election outcome, and indeed, the result was stronger than we had hoped for, with Modi securing a majority. The focus in India is on infrastructure; property, banks, construction and ports. Meanwhile in China we have tended to focus on the consumer, with insurance and liquor the latest areas to attract our attention. Across the region, financials, consumer, technology and industrials make-up the bulk of the Fund, which carries no stock shorts at this juncture, reflective of the positive opportunities we can see. However, we do have a partial hedge on the Chinese yuan, as we believe that it acts as a potential policy lever for the administration should they need to use it and hence offers an attractive payoff for the Fund.

The Fund has benefited strongly over the last 12 months from being on the right side of the changes taking place across the region with the contribution from Indian stocks outstanding, while China, ASEAN and Korea also had a meaningful impact. At a sector level, it was financials and industrials at the core of returns, aided principally by consumer stocks and technology.
