Platinum Investment Management Limited ABN 25 063 565 006 AFSL 221935, trading as Platinum Asset Management ("Platinum") is the responsible entity of the Platinum Asia Fund (Quoted Managed Hedge Fund) (the "Fund"). The Fund's latest Product Disclosure Statement (the "PDS") provides details about the Fund. You can obtain a copy of the PDS from Platinum's website www.platinum.com.au, or by contacting Investor Services on 1300 726 700 (Australian investors only), or 0800 700 726 (New Zealand investors only), or 02 9255 7500, or via invest@platinum.com.au. This information is general in nature and does not take into account your specific needs or circumstances. You should consider your own financial position, objectives and requirements and seek professional financial advice before making any financial decisions. Numerical figures have been subject to rounding. Platinum does not guarantee the performance of the Fund, the repayment of capital or the payment of income. The market commentary reflects Platinum's views and beliefs at the time of preparation, which are subject to change without notice. No representations or warranties are made by Platinum as to their accuracy or reliability. To the extent permitted by law, no liability is accepted by Platinum for any loss or damage as a result of any reliance on this information.

1. & 2. Source: Platinum for Fund returns and RIMES Technologies for MSCI returns. Investment returns are calculated using the Fund's NAV unit price (i.e. exclude a buy/sell spread), and represent the combined income and capital returns in the specified period. All returns are pre-tax, net of fees (including any accrued performance fee) and costs and assume the reinvestment of distributions. The returns are calculated relative to the MSCI All Country Asia ex-Japan Net Index in A\$. The investment returns depicted in the graph are cumulative on A\$20,000 invested in the Fund since inception. Past performance is not a reliable indicator of future returns. Platinum does not invest by reference to the weightings of the index. The index is provided as a reference only.

3. The "Long %" is the exposure to long securities and long securities/index derivative positions, the "Short %" is the exposure to short securities and short securities/index derivative positions and the "Net %" is the exposure to long and short securities and long and short securities/index derivative positions, each as a percentage of the Platinum Asia Fund's ("PAF's") net asset value. The "Currency %" is the effective currency exposure of PAF's portfolio as a percentage of its net asset value, taking into account long and short securities, cash, forwards and long and short securities/index derivative positions. For the "Industry breakdown", index positions (whether through ETFs or derivatives) are only included under the relevant sector if they are sector specific, otherwise they are included under "Other".

3. and 4. China generally refers to securities or derivatives over securities, which securities are listed on the Shanghai or Shenzhen stock exchange. China Ex PRC generally refers to securities or derivatives over securities, which securities are listed outside of the PRC but provide exposure to PRC companies.

4. The "Top ten positions" show PAF's top ten long securities positions as a percentage of PAF's net asset value (including long securities and long securities derivative positions).

This commentary relates to the underlying fund, Platinum Asia Fund.

- July was a month of respite with stability in Asia and good performance for the portfolio.
- China showing signs of stability.
- Caution required given trade tension escalation and yuan devaluation (we are short offshore RMB).

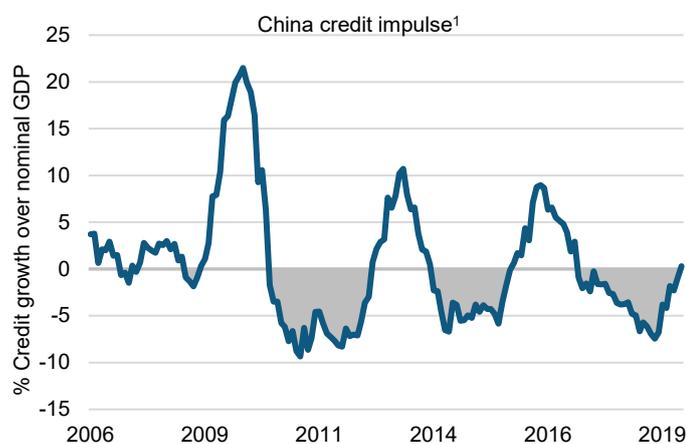

Asian regional markets were basically flat in Australian dollars in July, yet the Fund posted a solid return while maintaining a prudent cash balance and shorting some of the region's highly-valued biotech stocks. July's positive performance was largely driven by Asian technology holdings, in particular the large platform stocks such as Tencent and Naver, as well as memory chip makers such as Taiwan Semi and SK Hynix.

Amid constant trade uncertainty, and frequent disruptive trade policy by Tweet, the Chinese economy is actually showing signs of stabilisation and recovery. Power demand, having fallen to just 2.4% p.a. growth in May, strengthened to 5.5% p.a. growth in June (Source: Citi). Moreover, this is not the result of blockbuster spending in infrastructure projects – growth of which remains weak. Fixed asset investment in non-power sectors grew at 4.1% p.a. in June (comfortably lower than nominal GDP growth), while investment in the grid in China was down 19% p.a. in June (Source: Bloomberg). Should Chinese officials so wish, they can increase infrastructure spending, and while this is an option, we think stimulus via huge infrastructure spending is unlikely. Rather, Chinese officials appear focused on stimulus via tax cuts to low income earners and small businesses, as well as lowering interbank rates in the banking system. China's "credit impulse" (credit growth less nominal GDP growth) just turned positive in June, following a protracted negative period previously (Source: Bloomberg).

Subsequent to month end we have seen increasing trade tensions between the US and China, with an additional 10% tariff on Chinese exports to the US threatened by President Trump. The Chinese allowed the Chinese RMB to depreciate to above 7 yuan to the US dollar. Note we are short the RMB and long the US dollar and US dollar-pegged Hong Kong dollars. We have lowered exposure to markets subsequent to quarter end as a result of trade tensions.

In response to ongoing demonstrations in Hong Kong, we have lowered domestic Hong Kong exposure (i.e. businesses that operate in Hong Kong, not merely Chinese firms listed there) to close to zero.

The portfolio is carrying sensible cash levels amid difficult markets, but we are not of a mind to short markets aggressively in Asia. Indeed, it is in Asia where we see much of the best value to be found in equity markets globally.
