1. Investment returns are calculated using the Fund's daily unit price for C Class and P Class, and represent the combined income and capital returns for each of these unit classes in the specified period. They are net of fees and costs (excluding the buy-sell spread). Returns for C Class are net of any investment performance fee payable. Returns for P Class are net of any accrued investment performance fee. All returns are pre-tax and assume the reinvestment of distributions. Investment returns are calculated relative to the MSCI All Country World Net Index in A\$. The investment returns shown are historical and no warranty can be given for future performance. You should be aware that historical performance is not a reliable indicator of future performance. Due to the volatility of underlying assets of the Fund and other risk factors associated with investing, investment returns can be negative (particularly in the short-term). 2. The investment returns depicted in this graph are cumulative on A\$20,000 invested in the Fund since inception relative to the MSCI All Country World Net Index in A\$ ("Index"). The investment returns are calculated using the Fund's unit price (C Class). They are net of fees and costs (excluding the buy-sell spread and any investment performance fee payable), pre-tax and assume the reinvestment of distributions. It should be noted that Platinum does not invest by reference to the weightings of the Index. Underlying assets are chosen through Platinum's individual stock selection process and as a result holdings will vary considerably to the make-up of the Index. The Index is provided as a reference only. Source: Platinum for fund returns and RIMES Technologies for MSCI returns.

3. The "Long %" represents the exposure of physical holdings and long stock derivatives as a % of NAV. The "Net %" represents the exposure of physical holdings and both long and short derivatives. The "Currency %" represents the currency exposure for the Fund as a % of NAV, taking into account currency hedging.

4. Top Ten positions shows the Fund's top long share exposure positions as a % of NAV. Long derivative exposures are included, however, short derivative exposures are not.
