Platinum Investment Management Limited ABN 25 063 565 006 AFSL 221935, trading as Platinum Asset Management ("Platinum") is the investment manager of Platinum Capital Limited ("PMC"). This information is general in nature and does not take into account your specific needs or circumstances. You should consider your own financial position, objectives and requirements and seek professional financial advice before making any financial decisions. Numerical figures have been subject to rounding. Neither PMC nor Platinum, guarantee the performance of PMC, the repayment of capital or the payment of income. The market commentary reflects Platinum's views and beliefs at the time of preparation, which are subject to change without notice. No representations or warranties are made by PMC or Platinum as to their accuracy or reliability. To the extent permitted by law, no liability is accepted by PMC or Platinum for any loss or damage as a result of any reliance on this information.

1. Source: Platinum. The pre-tax NTA was calculated in accordance with Australian Accounting Standards, based on the fair value of all investments. The post-tax NTA is the pre-tax NTA after provision for tax on both realised and unrealised income and gains. The NTA is unaudited.

2. Source: Platinum for portfolio returns and Factset Research Systems for MSCI returns. The returns are calculated relative to the MSCI All Country World Net Index in A\$ (except the gross MSCI index was used prior to 31/12/96). Past performance is not a reliable indicator of future returns. Platinum does not invest by reference to the weightings of the index. The index is provided as a reference only.

3. Shows dividends determined in respect of the relevant financial year. This information is historical. No guarantee is given about future dividends or the level of franking of such dividends.

4. The "Long %" is the exposure to long securities and long securities/index derivative positions, the "Short %" is the exposure to short securities and short securities/index derivative positions and the "Net %" is the total of the "Long %" and "Short %", each as a percentage of PMC's portfolio value. The "CCY %" is the effective currency exposure of PMC's portfolio as a percentage of its portfolio value, taking into account long and short securities, cash, forwards and long and short securities/index derivative positions. For the "Industry breakdown", index positions (whether through ETFs or derivatives) are only included under the relevant sector if they are sector specific, otherwise they are included under "Other".

4. and 5. Country classifications for securities reflect Bloomberg's "country of risk" designations, and currency classifications for securities reflect the relevant local currencies of the country classifications.

5. The "Top ten positions" show PMC's top ten long securities positions as a percentage of PMC's portfolio value (including long securities and long securities derivative positions).

All data where MSCI is referenced is the property of MSCI Limited ("MSCI"). No use or distribution of this data is permitted without the written consent of MSCI. This data is provided "as is" without any warranties by MSCI.

MSCI assumes no liability for or in connection with this data. Please see full MSCI disclaimer in <https://www.platinum.com.au/Special-Pages/Terms-Conditions>

MARKET UPDATE AND COMMENTARY

- The portfolio was up 1.9% in February, against a global benchmark down 0.3%.
- Over three months the portfolio is up 6% (vs the index at 5.1%) with average net exposure around 80%.

Market Overview

- Chinese stocks performed well, led by Tencent - there is continued interest in Chinese tech - and a resurgence in two property companies, China Overseas Land and China Resources Land.
- Enthusiasm around a potential peace deal in Ukraine saw strong performance from two Eastern European holdings, Hungarian airline Wizz Air and Austria's Raiffeisen Bank.
- The short book added 1% to returns, largely from our decision to short some over-valued stocks which fell around 10% in a largely flat market.

Over the past month – and quarter - the biggest driver of performance has been the portfolio's Chinese holdings, which make up about 20% of the book, but which contributed about half the return. We have seen particularly good performance from Tencent, JD.com and China Merchants Bank.

Donald Trump's return to the White House led to another surge in US technology stocks. However, we are now seeing signs that market leadership might be shifting. The rest of the US market (the 'S&P 493') has been performing better than the 'Magnificent Seven' that dominated the market narrative in the past several years.

Some non-US markets have outperformed the US market significantly in 2025. As at March 4th, the S&P500 was down 0.4% while the Stoxx Europe 600 Index was up over 11% (Source: Factset). As we have been arguing in recent times, this lengthy period of US dominance is highly unusual and if this normalisation continues it may boost our portfolio which has more balanced weighting across global markets.

Change of Portfolio Manager

As we [announced](#) in late February, Clay Smolinski and Andrew Clifford have stepped back from managing the global strategies including the Platinum Capital Portfolio. Clay will take a leave of absence for six months and at the end of this period, in consultation with management, will determine whether he returns to an alternative role with Platinum's investment team. Andrew Clifford will take up a role as a mentor and adviser to the investment team through our Investment Oversight Group.

We have appointed Ted Alexander as the Portfolio Manager for Platinum's global strategies.

We recorded a video interview with Ted Alexander that will be available on Platinum's Journal page on or around March 10 – see www.platinum.com.au/the-journal.

An attractively valued portfolio

The portfolio's aggregate valuation metrics are attractive in an absolute sense and relative to the market, with a 64% higher earnings yield and a 50% discount on a price-to-book basis.

Metric	Platinum Capital Limited	MSCI AC World Net Index (A\$)
NTM Earnings Yield	9.0% (Price-to-Earnings ratio of 11.1x)	5.5% (Price-to-Earnings ratio of 18.1x)
NTM Dividend Yield	2.5%	1.9%
NTM Enterprise Value-to-Sales	1.8x	2.8x
LTM Price-to-Book Ratio	1.6x	3.2x

The valuations in the table have been calculated by Platinum and for the portfolio refer to the long portion of the portfolio, exclude negative net earnings and use FactSet consensus earnings. MSCI data is sourced from Rimes, FactSet and Platinum. As at 28 February 2025. NTM = next twelve months. LTM = last twelve months.

*Source: Platinum. Contribution numbers are based on the total return of individual positions (in AUD) and are gross as they do not take into account the portfolios fees and costs (other than brokerage). **Past performance is not a reliable indicator of future returns.**
