

### Platinum International Fund

Annual Investment Return Year to 30 June	% Return
2020	(4.10)
2019	0.74
2018	14.23
2017	21.34
2016	(6.29)

Investment returns are calculated using the Fund's unit price (C Class) and represent the combined income and capital return for the specific period. They are net of fees and costs (excluding the buy/sell spread and any investment performance fee payable), are pre-tax and assume the reinvestment of distributions.

The investment returns shown are historical and no warranty can be given for future performance. Historical performance is not a reliable indicator of future performance. Due to the volatility of the underlying assets of the fund and other risk factors associated with investing, investment returns can be negative, particularly in the short-term.
