Notes	2	they are not in relation to Taxable Australian Property. These capital gains are therefore labelled above as Non-Taxable Australian Property (NTAP) (Australians Only) The amount in the 'Gross Amount Taxable (\$)' column in the distribution statement needs to be multiplied by two and offset by any capital losses you may choose to apply before applying your appropriate discount concession (ie, 50% for individuals and trusts and 33.3% for complying superannuation entities).															
Notes	(a)	Includes Australian sourced foreign exchange gains.															
	(b)	Includes foreign dividends, foreign exchange gains on bank accounts and gains on foreign exchange and derivative hedging contracts.															
	(c)	Represents capital gains realised on assets disposed of and not held for 12 months or more.															
	(d)	Represents 50% of the capital gains on disposal of assets which had been held for 12 months or more.															
	(e)	Represents the non-taxable amount of the capital gains and does not reduce the cost base of units. The CGT Concession Amount may not be the same as the Discounted component because expenses are only allocated against taxable components.															
	(f) Capital gains tax may be applied by Foreign Tax Authorities on disposals of investments held in the foreign jurisdiction. Where such amounts are applied, investors may be entitled to a tax offset in respect of the taxes paid.																

We strongly recommend that investors seek professional tax advice in relation to the above. Platinum Asset Management does not give tax advice.

Such tax offsets have been disclosed against foreign capital gains.
