Platinum Investment Management Limited ABN 25 063 565 006 AFSL 221935, trading as Platinum Asset Management ("Platinum") is the investment manager of Platinum Asia Investments Limited ("PAI"). This information is general in nature and does not take into account your specific needs or circumstances. You should consider your own financial position, objectives and requirements and seek professional financial advice before making any financial decisions. Numerical figures have been subject to rounding. Neither PAI nor Platinum, guarantee the performance of PAI, the repayment of capital or the payment of income. The market commentary reflects Platinum's views and beliefs at the time of preparation, which are subject to change without notice. No representations or warranties are made by PAI or Platinum as to their accuracy or reliability. To the extent permitted by law, no liability is accepted by PAI or Platinum for any loss or damage as a result of any reliance on this information.

1. Source: Platinum. The pre-tax NTA was calculated in accordance with Australian Accounting Standards, based on the fair value of all investments. The post-tax NTA is the pre-tax NTA after provision for tax on both realised and unrealised income and gains. The NTA is unaudited.

2. Source: Platinum for portfolio returns and Factset Research Systems for MSCI returns. The returns are calculated relative to the MSCI All Country Asia ex Japan Net Index in A\$. Past performance is not a reliable indicator of future returns. Platinum does not invest by reference to the weightings of the index. The index is provided as a reference only.

3. Shows dividends determined in respect of the relevant financial year. This information is historical. No guarantee is given about future dividends or the level of franking of such dividends.

4. The "Long %" is the exposure to long securities and long securities/index derivative positions, the "Short %" is the exposure to short securities and short securities/index derivative positions and the "Net %" is the total of the "Long %" and "Short %", each as a percentage of PAI's portfolio value. The "CCY %" is the effective currency exposure of PAI's portfolio as a percentage of its portfolio value, taking into account long and short securities, cash, forwards and long and short securities/index derivative positions. For the "Industry breakdown", index positions (whether through ETFs or derivatives) are only included under the relevant sector if they are sector specific, otherwise they are included under "Other".

4. and 5. Country classifications for securities reflect Bloomberg's "country of risk" designations, and currency classifications for securities reflect the relevant local currencies of the country classifications.

5. The "Top ten positions" show PAI's top ten long securities positions as a percentage of PAI's portfolio value (including long securities and long securities derivative positions). All data where MSCI is referenced is the property of MSCI Limited ("MSCI"). No use or distribution of this data is permitted without the written consent of MSCI. This data is provided "as is" without any warranties by MSCI.

MSCI assumes no liability for or in connection with this data. Please see full MSCI disclaimer in <https://www.platinum.com.au/Special-Pages/Terms-Conditions>

MARKET UPDATE AND COMMENTARY

- The portfolio returned 0.6% for October 2024.
- Chinese holdings gave up a portion of their extraordinary September returns and Indian stocks were weak. More generally, emerging market stocks struggled on expectations that US rates would stay elevated.
- The portfolio holds 5% cash, is around 95% long and has zero shorts, reflecting the compelling long-term opportunities in the Asia region.

Performance Analysis*

The portfolio is up over 20% for the year to end October.

Chinese stocks gave up some of the stellar returns of the prior month (where they were boosted by stimulus announcements). In the main they remain firmly ahead of where they were at the end of August and in total made a slight positive contribution to returns. As discussed previously, property remains a bellwether for the Chinese economy. We have seen primary property sales improve and a couple of tier one cities have seen secondary sales improvement. This is positive but only a single datapoint, thus care should be taken not to extrapolate this out too far.

The Indian market was weak, with the Nifty 50 falling 6.2%. InterGlobe (IndiGo airlines) was down -17% and therefore detracted from portfolio returns. This takes only some of the gloss off what has been an outstanding period for InterGlobe which is up more than four times since we first invested in mid-2020. The long term trajectory for Indian travel remains a highly interesting growth story, however after such a strong run we have been trimming the position.

World-leading chip foundry, TSMC, our largest portfolio position, was the strongest contributor to monthly returns, being up around 6% and leading the Taiwan TAIEX higher. SK Hynix, another semiconductor holding, was up nearly 7%.

More generally, while the US election created a strong element of uncertainty, increasing rates across the US yield curve has also been a cause for concern in emerging markets equities. The potential for stickier inflation is increasing long term rate expectations which has weighed on broad market returns for the month.

We continue to trim a number of our larger, stronger returning portfolio positions. For example, Trip.com, a positive contributor for the month, was up nearly 50% for the last three months, Alibaba up 22% and Ping An Insurance up over 40%. We trimmed all these positions to lock in profits and manage risk.

We introduced Kuaishu Technology into the portfolio. Kuaishu is a Chinese mobile app for sharing short form videos, live streaming and ecommerce. This is the number three player in what is a very large and quite fragmented market where short form video is the second largest market for internet users. Some 96% use short form video services, just behind instant messaging at 97%. Kuaishu's valuation and potential profit growth profile provide an interesting opportunity in what is a cyclical low point in the advertising industry.

As at the end of October 2024, the portfolio retains its high net invested position at approximately 95% with no shorts and around 5% cash. This reflects our high levels of conviction in the stocks in our portfolio and the very low valuations we are seeing in the region.

An attractively valued portfolio

The portfolio's aggregate valuation metrics are attractive in both an absolute sense and relative to the market, with a ~24% higher earnings yield and ~6% discount on price-to-book value (see table below).

Metric	Platinum Asia Investments Limited	MSCI AC Asia ex-Japan Net Index (A\$)
NTM Earnings Yield	9.7% (Price-to-Earnings ratio of 10.3x)	7.8% (Price-to-Earnings ratio of 12.9x)
NTM Dividend Yield	3.0%	2.9%
NTM Enterprise Value-to-Sales	1.4x	1.6x
LTM Price-to-Book Ratio	1.5x	1.6x

The valuations in the table have been calculated by Platinum and for the portfolio refer to the long portion of the portfolio, exclude negative net earnings and use FactSet consensus earnings. MSCI data is sourced from Rimes, FactSet and Platinum. As at 31 October 2024. NTM = next twelve months. LTM = last twelve months. *Source: Platinum. Contribution numbers are based on the total return of individual positions (in AUD) and are gross as they do not take into account the portfolio's fees and costs (other than brokerage). **Past performance is not a reliable indicator of future returns.**
