MONTHLY REPORT 31 January 2025

# MARKET UPDATE AND COMMENTARY

- The portfolio returned 0.4% for the month, while the market was essentially flat. The portfolio's one-year return was over 24%.
- After an incredible run, the MSCI India Index posted its fourth consecutive monthly decline as the outlook for the economy and company earnings deteriorated. We struggle to find attractive opportunities, particularly given governance risk and high valuations.

## Market Overview

Asia ex-Japan markets were flat in AUD terms in January (based on the MSCI AC Asia Ex-Japan index) as they continue to be shaped by the interplay of domestic policies, global economic conditions, and geopolitical factors. A late-month sell-off in AI-related and semiconductor supply chains stocks was triggered by uncertainty as to how new low-cost Chinese Chat-GPT competitor DeepSeek would affect companies in the region that are tied into US-focused AI/semiconductor supply chains.

Market performance was mixed, with many of 2024's strong performers weaker in January (and vice-versa). South Korea (MSCI Korea down 12% in 2024) was up 5% in January, and our low Indian exposure proved beneficial as the MSCI India index posted a disappointing fourth consecutive monthly fall. We have noted our struggle to find good businesses at attractive valuations in India, so we are not surprised by the market sell-off as the outlook for the economy and company earnings deteriorated. We remain cautious.

After a strong 2024 – the MSCI China Index was up 20% - China's market was up another 1% in January. It was boosted by the announcement of lower-than-feared 10% US tariffs and the emergence of DeepSeek.

The ASEAN region, where we have built-up exposure to the current level of 17% in recent years, was down slightly after a reasonably strong 2024. We continue to be bullish as the region is home to some very attractive opportunities, particularly with rate cutting cycles already underway in some countries.

### **Performance Analysis**

The Portfolio's 98% net exposure produced a positive, albeit modest, return of +0.4%, against a flat market. South Korea, Taiwan and China holdings were positive contributors. Top stock performers included Technology and Al supply chain stocks SK Hynix (Korea) and TSMC (Taiwan) and Chinese technology company, Meitu, which primarily develops Al-powered photo and video editing apps. Meitu stock surged 41% in the month as they could be a beneficiary of DeepSeek's more cost-efficient Al capabilities. We trimmed our holding at the end of the month given this rise. Consumer discretionary stocks from China (JD.com, PDD Holdings), South Korea (Coway) and Taiwan (Nien Made Enterprises) all did well as did property developer China Resources Land.

We saw weakness in various financial and real estate holdings including Ping An Insurance and Noah Holdings (China) and Ayala Land from the Philippines. We have captured considerable returns in recent years from Indian property developer Macrotech and India's leading low-cost airline, Interglobe Aviation. They were small detractors in January.

### **Portfolio Valuations**

The portfolio's aggregate valuation metrics are attractive in an absolute sense and relative to the market, with a 27% higher earnings yield and a 20% discount on a price-to-book basis.

Metric	Platinum Asia Investments Limited	MSCI AC Asia ex-Japan Net Index (A\$)
NTM Earnings Yield	10.1% (Price-to-Earnings ratio of 9.9x)	7.9% (Price-to-Earnings ratio of 12.7x)
NTM Dividend Yield	2.8%	2.6%
NTM Enterprise Value-to-Sales	1x	1.8x
LTM Price-to-Book Ratio	1.6x	2x

The valuations in the table have been calculated by Platinum and for the portfolio refer to the long portion of the portfolio, exclude negative net earnings and use FactSet consensus earnings. MSCI data is sourced from Rimes, FactSet and Platinum. As at 31 January 2025. NTM = next twelve months. LTM = last twelve months.

\*Source: Platinum. Contribution numbers are based on the total return of individual positions (in AUD) and are gross as they do not take into account the Portfolio's fees and costs (other than brokerage). **Past performance is not a reliable indicator of future returns.**
