Platinum Investment Management Limited ABN 25 063 565 006 AFSL 221935, trading as Platinum Asset Management ("Platinum") is the investment manager of Platinum Capital Limited ("PMC"). This information is general in nature and does not take into account your specific needs or circumstances. You should consider your own financial position, objectives and requirements and seek professional financial advice before making any financial decisions. Numerical figures have been subject to rounding. Neither PMC nor Platinum, guarantee the performance of PMC, the repayment of capital or the payment of income. The market commentary reflects Platinum's views and beliefs at the time of preparation, which are subject to change without notice. No representations or warranties are made by PMC or Platinum as to their accuracy or reliability. To the extent permitted by law, no liability is accepted by PMC or Platinum for any loss or damage as a result of any reliance on this information.

1. Source: Platinum. The pre-tax NTA was calculated in accordance with Australian Accounting Standards, based on the fair value of all investments. The post-tax NTA is the pre-tax NTA after provision for tax on both realised and unrealised income and gains. The NTA is unaudited.

2. Source: Platinum for portfolio returns and Factset Research Systems for MSCI returns. The returns are calculated relative to the MSCI All Country World Net Index in A\$ (except the gross MSCI index was used prior to 31/12/96). Past performance is not a reliable indicator of future returns. Platinum does not invest by reference to the weightings of the index. The index is provided as a reference only.

3. Shows dividends determined in respect of the relevant financial year. This information is historical. No guarantee is given about future dividends or the level of franking of such dividends.

4. The "Long %" is the exposure to long securities and long securities/index derivative positions, the "Short %" is the exposure to short securities and short securities/index derivative positions and the "Net %" is the total of the "Long %" and "Short %", each as a percentage of PMC's portfolio value. The "CCY %" is the effective currency exposure of PMC's portfolio as a percentage of its portfolio value, taking into account long and short securities, cash, forwards and long and short securities/index derivative positions. For the "Industry breakdown", index positions (whether through ETFs or derivatives) are only included under the relevant sector if they are sector specific, otherwise they are included under "Other".

4. and 5. Country classifications for securities reflect Bloomberg's "country of risk" designations, and currency classifications for securities reflect the relevant local currencies of the country classifications.

5. The "Top ten positions" show PMC's top ten long securities positions as a percentage of PMC's portfolio value (including long securities and long securities derivative positions).

All data where MSCI is referenced is the property of MSCI Limited ("MSCI"). No use or distribution of this data is permitted without the written consent of MSCI. This data is provided "as is" without any warranties by MSCI. MSCI assumes no liability for or in connection with this data. Please see full MSCI disclaimer in <https://www.platinum.com.au/Special-Pages/Terms-Conditions>

## MARKET UPDATE AND COMMENTARY

- The portfolio returned -2.0% for June 2024, taking the rolling one-year number to +3.7%.
- Platinum's investment philosophy has always been to find mispriced stocks and opportunities in areas that are out of favour and away from the crowd. We avoid trying to predict which direction the overall market is heading and instead look to invest capital in attractively valued, idiosyncratic business opportunities over the medium to long term.

### Performance Analysis\*

The portfolio returned -2.0% for the month of June 2024. The long book detracted 1.3% from performance while cash and currency detracted 0.5%. The portfolio had a large Yen position and was underweight the US dollar. This position moved against us in June when the USD settled at nearly 38-year highs against the Yen as Treasury yields on the long end rose sharply. Investors are on heightened alert for intervention from Japanese authorities designed to bolster the country's currency.

The MSCI All Country World Index rose +1.8% during the month, driven by the "Magnificent Seven" stocks, a group which has distorted relative outcomes in recent years. Concerns about market breadth were frequently aired with a ~350bp performance gap opening between market cap weighted index and its equal weight variant (-1.7% for the month of June).

Top contributors to performance were our semiconductor positions, Taiwan Semiconductor Manufacturing Company (TSMC), Broadcom, and Samsung Electronics. This is our preferred way to play the AI thematic. When a multipurpose technology such as AI comes along, it is important to pay attention because it will most likely have widespread applications (as was the case with the introduction of the internet and data on mobiles). However, it is very difficult to determine who will profit from the technology in the early stages of adoption. Platinum's preferred approach to investing in this space is to focus on companies who will do very well if AI spending continues to grow and who are trading at reasonable valuations vs. their history. However, we also prefer that the companies we invest in have strong non-AI related businesses that support the current valuations if the AI hype does not live up to expectations. This is the case with TSMC, Broadcom and Samsung Electronics.

Detractors to performance included Chinese parcel delivery business, ZTO Express, Canadian uranium company Cameco Corp and pulp and paper company UPM-Kymmene. Shares in ZTO Express were hit during June as the market dialled back market share estimates as the company said it would concentrate on profit rather than market share gains. While this is a short term hit, we think this is a smart pivot in strategy and will set ZTO Express up to take market share in the long term off irrational and unprofitable competition.

Shares in Cameco dropped as the uranium price retraced on fears of rising supply and worries the higher uranium price would have a negative impact on demand. Long term, we are still bullish on uranium as it is needed for the transition away from fossil fuel derived energy sources. The uranium sector has been struggling for over a decade and we think spot prices are still too low to incentivise a lot of idled mines. Planned maintenance at some paper mills weighed on shares in UPM-Kymmene. As with the other stocks, we think this is a short term impact and that our investment thesis is intact: the strong pulp market and the ramp up at the Paso de los Toros plant will bolster earnings.

### A higher-yielding, attractively-valued portfolio

The portfolio's aggregate valuation metrics are attractive in both an absolute sense and relative to the market, with a ~48% higher earnings yield and a ~38% discount on an asset basis (see table below).

Metric	Platinum Capital Limited	MSCI AC World Net Index (A\$)
NTM Earnings Yield	8.3% (Price-to-Earnings ratio of 12x)	5.6% (Price-to-Earnings ratio of 17.7x)
NTM Dividend Yield	2.5%	2.3%
NTM Enterprise Value-to-Sales	1.9x	2.5x
LTM Price-to-Book Ratio	1.8x	2.9x

The valuations in the table have been calculated by Platinum and for the portfolio refer to the long portion of the portfolio, exclude negative net earnings and use FactSet consensus earnings. MSCI data is sourced from Rimes, FactSet and Platinum. As at 30 June 2024. NTM = next twelve months. LTM = last twelve months.

\*Source: Platinum. Contribution numbers are based on the total return of individual positions (in AUD) and are gross as they do not take into account the portfolio's fees and costs (other than brokerage). **Past performance is not a reliable indicator of future returns.**
