to their accuracy or reliability. To the extent permitted by law, no liability is accepted by Platinum for any loss or damage as a result of any reliance on this information. 1. & 2. Source: Platinum for Fund returns and Factset Research Systems for MSCI returns. Investment returns are calculated using the Fund's NAV unit price (i.e. exclude a buy/sell spread) for C Class and P Class (as indicated), and represent the combined income and capital returns for each of these unit classes in the specified period. All returns are pre-tax, net of fees and costs and as a result of any accrued investment performance fee. The returns are calculated returns to MSCI All Country World Net Index in A\$. Since inception date for C Class is 18/05/00 and for P Class is 03/07/17. Since inception date of C Class has been used for the purposes of calculating since inception returns of the index. The investment returns depicted in the graph are cumulative on A\$20,000 invested in C Class units in the Fund since the C Class inception date. **Past performance is not a reliable indicator of future returns**. It should be noted that Platinum does not invest by reference to the weightings of the index. The index is provided as a reference only.

Since the Collass interpriori date. Fast performance is not a remarker indicator or native retained, it should retain a short securities and short securities index derivative positions, the "Short %" is the exposure to short securities and short securities/index derivative positions, each as a percentage of the market value of the Fund's portfolio. The "Currency %" is the effective currency exposure as a percentage of the market value of the Fund's portfolio, taking into account long and short securities (active currency exposure as a percentage of the market value of the Fund's portfolio, taking into account long and short securities (active currency exposure as a percentage of the market value of the Fund's portfolio, taking into account long and short securities (active currency exposure as a percentage of the market value of the Fund's portfolio, taking into account long and short securities (active currency exposure as a percentage of the market value of the Fund's portfolio, taking into account long and short securities (active currency exposure as a percentage of the market value of the Fund's portfolio, taking into account long and short securities (active currency exposure as a percentage of the market value of the Fund's portfolio, taking into account long and short securities (active currency exposure) (active currency exposure as a percentage of the market value of the Fund's portfolio, taking into account long and short securities (active currency exposure) (active cur

3. and 4.
