

Target Market Determination – Platinum Global Transition Fund (Quoted Managed Hedge Fund)

Legal disclaimer

This Target Market Determination (**TMD**) is required under section 994B of the *Corporations Act 2001* (Cth) (**the Act**). This TMD describes the class of consumers that comprises the target market for the Platinum Global Transition Fund (Quoted Managed Hedge Fund) and matters relevant to the product's distribution and review (specifically, distribution conditions, review triggers and periods, and reporting requirements). Distributors must take reasonable steps that will, or are reasonably likely to, result in distribution of the product being consistent with the most recent TMD (unless the distribution is excluded conduct).

This document is **not** a Product Disclosure Statement (PDS) and is **not** a complete summary of the product features or terms of the product. This document does not take into account any person's individual objectives, financial situation or needs. Persons interested in acquiring units in the Platinum Global Transition Fund (Quoted Managed Hedge Fund) should carefully read the PDS for the Platinum Global Transition Fund (Quoted Managed Hedge Fund) before making a decision whether to buy this product.

Important terms used in this TMD are defined in the TMD Definitions which supplement this document. Capitalised terms have the meaning given to them in the product's PDS, unless otherwise defined. The PDS can be obtained by visiting the following webpage: https://www.platinum.com.au/our-products/pgtx-quoted-managed.

Target Market Summary

This product is intended for use as a minor allocation or satellite allocation within a consumer's investment portfolio for a consumer who is seeking capital growth and has a *High* risk/return profile for that portion of their investment portfolio. It is likely to be consistent with the financial situation and needs of a consumer with an investment timeframe of five years or more and who is likely to need to access their capital within one week of making a withdrawal request.

Fund and Issuer identifiers

Issuer	Platinum Investment Management Limited
Issuer ABN	25 063 565 006
Issuer AFSL	221935
TMD contact details	invest@platinum.com.au
Fund	Platinum Global Transition Fund (Quoted Managed
	Hedge Fund)
ARSN	658 996 251
APIR Code	PLA6719AU
ISIN Code	AU0000262271
Market Identifier Code	XASX
Product Exchange Code	PGTX
TMD issue date	19 February 2024
TMD Version	2
Distribution status of fund	Available

Description of Target Market

TMD indicator key

The Consumer Attributes for which the product is likely to be appropriate have been assessed using a red and green rating methodology:

In target market Not in target market

Instructions

In the tables below, Column 1, Consumer Attributes, indicates a description of the likely objectives, financial situation and needs of the class of consumers that are considering this product. Column 2, TMD indicator, indicates whether a consumer meeting the attribute in column 1 is likely to be in the target market for this product.

Appropriateness

The Issuer has assessed the product and formed the view that the product, including its key attributes, is likely to be consistent with the likely objectives, financial situation and needs of consumers in the target market, as the features of this product in Column 3 of the table below are likely to be suitable for consumers with the attributes identified with a green TMD Indicator in Column 2.

Investment products and diversification

A consumer (or class of consumer) may intend to hold a product as part of a diversified portfolio (for example, with an intended product use of minor allocation). In such circumstances, the product should be assessed against the consumer's attributes for the relevant portion of the portfolio, rather than the consumer's portfolio as a whole. For example, a consumer may seek to construct a balanced or moderate diversified portfolio with a minor allocation to growth assets. In this case, a product with a High risk/return profile may be consistent with the consumer's objectives for that minor allocation notwithstanding that the risk/return profile of the consumer as a whole is Medium. In making this assessment, distributors should consider all features of a product (including its key attributes).

The FSC has provided more detailed guidance on how to take this portfolio view for diversification, available on the FSC website.

Consumer Attributes	TMD Indicator	Product description including key attributes
Consumer's investment objective		
Capital Growth		The Fund aims to provide capital growth over the long-term by investing in undervalued
Capital Preservation		companies from around the world that are seeking to financially benefit from the transition away from fossil fuel-derived energy and goods production and consumption
Income Distribution		i.e. the carbon transition.
Consumer's intended product use (%	of Investable Assets	
Solution/Standalone (up to 100%)		The Fund primarily invests in listed equity securities. The portfolio will ideally consist of
Major allocation (up to 75%)		25 to 60 securities that Platinum believes to be undervalued by the market. The Fund may invest in the securities of companies that are seeking to financially benefit
Core component (up to 50%)		from the carbon transition, that is, the transition away from fossil fuel-derived energy and
Minor allocation (up to 25%)		goods production and consumption. This may include, but is not limited to, investments
Satellite allocation (up to 10%)		in the following areas: renewable energy production and transmission; renewable energy storage; energy efficiency; electrification of transport; scope 1, 2 and 3 emissions reduction; the circular economy; sustainable food production; hydrocarbon substitutes; materials, components and infrastructure used to enable the carbon transition.
		The Fund will typically have 50% or more net equity exposure. Cash and cash equivalents may be held when undervalued securities cannot be found.
		The Fund may enter into derivatives (including OTC derivatives) transactions.
		Platinum may short sell securities that it considers to be overvalued.
		The Fund is designed to be held as part of a diversified investment portfolio and is either suitable as a minor allocation or satellite allocation within an investor's investment portfolio.
Consumer's investment timeframe		
Minimum investment timeframe	5 years or more	The Fund is designed for an investor with a timeframe of five years or more.
		Given the nature of the Fund, being a fund that is positioned to take advantage of the carbon transition over the coming 20 years or so, Platinum has opted for the Fund to be automatically terminated on or around 1 July 2050.
Consumer's Risk (ability to bear loss) and Return profile	

Low	The Fund is suitable for investors that have a high risk and return profile i.e. investors
Medium	who typically prefer growth assets, can accept high volatility and potential losses and seek high returns over five years or more.
High	riigh feturiis over five years of more.
Very High	The Fund has a standard risk measure (SRM) of 5 (high).
Extremely High	
Consumer's need to access capital	
Within one week of request	Investors can exit the Fund either by directly making a withdrawal request to the unit
Within one month of request	registry or by selling units on the ASX.
Within three months of request	You will need to hold your units on Platinum's issuer sponsored sub-register to make a
Within one year of request	withdrawal request to the unit registry. Your stockbroker can assist you with this process if you hold your units on a HIN via a broker sponsored sub-register. Under normal circumstances, withdrawal requests are processed on each ASX trading day. Platinum's unit registry can delay processing withdrawal requests whilst the Fund is not "liquid" as defined in the Corporations Act. Please see the PDS for more information. The proceed
Within 5 years of request	
Within 10 years of request	
10 years or more	of withdrawal are usually made available within one week of Platinum accepting any
At issuer discretion	withdrawal request.
	You will need to hold your units on a broker sponsored sub-register to sell your units on the ASX. Your stockbroker can assist you with this process if you hold your units under an SRN via Platinum's issuer sponsored sub-register. Sales will be settled via the CHESS settlement service, generally two ASX trading days following the sale.
	There are important differences between exiting the Fund by withdrawing units directly through the unit registry or via the ASX. These differences include the exit price you will receive.
	An investor who withdraws units through the unit registry is likely to receive a different price for units in the Fund to an investor who sells units on the ASX at the exact same time. These differences in prices received by investors may result in a different return from an investment in the Fund.

Distribution conditions/restrictions

Distribution Conditions	Distribution condition rationale	Distribution condition applies to
Investors who have not received personal financial advice must complete a number of questions titled Product Suitability contained within the application form or provided as part of the onboarding process to identify the purpose of their investment. Responses to these questions will be assessed by Platinum. If an investor is identified as being at risk of harm, Platinum's trained staff will contact the investor and ask a series of scripted questions in order for Platinum to understand whether the investor is within the target market. These questions will align to the attributes in the TMD. Following this, if the investor is assessed as being unlikely to be in the target market, the investor will be rejected.	Platinum considers that this distribution condition will make it likely that consumers who acquire the Fund will be in the target market for the Fund.	Platinum - Direct and unadvised retail submitting applications directly to the unit registry.
Distributors may engage in retail product distribution conduct if they are providing personal advice in relation to the Fund and they are reasonably satisfied that distribution is necessary to implement personal advice given to the consumer.	Platinum considers that this distribution condition will make it likely that consumers who acquire the Fund will be in the target market for the Fund because persons providing personal advice must consider the consumer's individual circumstances and comply with the best interests' duty and related obligations under Pt 7.7A of the Act.	Persons providing personal advice to retail – Direct advised retail submitting applications directly to the unit registry.
This Fund is available to persons investing through an investor directed portfolio service (IDPS), IDSP-like scheme, nominee or custody service or any other trading platform or distributor authorised by Platinum.	Platinum has an arrangement with platform provider governing their relationship noting that platform providers, as distributors, are required to take reasonable steps that will, or are likely to, result in distribution of the Fund being consistent with its TMD.	Intermediated (e.g. platform or wrap) submitting applications directly to the unit registry.
This Fund is available through specified distributors or distribution channels such as investment or super platforms or wrap products (platforms).	Platinum has an arrangement with platform provider governing their relationship noting that platform providers, as distributors, are required to take reasonable steps that will, or are	Intermediated (e.g. platform or wrap) submitting applications directly to the unit registry.

Distribution Conditions	Distribution condition rationale	Distribution condition applies to
	likely to, result in distribution of the Fund being consistent with its TMD.	
Distributor advertising material will state full name of Fund, at	This ensures that the investor is able to	Platinum
least once, as stated in PDS.	identify the Fund and ensure that they are	
	reading the correct PDS and TMD.	
Platinum will make the TMD available via the Market	This will mean the investor is able to	Platinum
Announcements Platform together with the PDS.	access the PDS and TMD in the one	
	location, making it easier for the investor	
	to locate the TMD.	

It has been determined that the distribution conditions will make it likely that new consumers who purchase the Fund are in the class of customers for which it has been designed. We consider that the distribution conditions are appropriate for this Fund and will assist distribution in being directed towards the target market for whom the Fund has been designed.

Review triggers

Material change to key attributes, Fund investment objective and/or fees.

Material deviation from objective over sustained period.

Key attributes have not performed as disclosed by a material degree and for a material period.

Determination by the issuer of an ASIC reportable Significant Dealing.

Material or unexpectedly high number of complaints (as defined in section 994A(1) of the Act) about the Fund or distribution of the Fund.

The use of Product Intervention Powers, regulator orders or directions that affects the Fund.

Material changes to the liquidity of the Fund impacting the Fund's ability to offer regular off-market withdrawals or impacting the Fund's ability to satisfy net withdrawals arising as a result of Platinum's market making activities.

Removal of the Fund from the approved product lists and menus of key distributors.

The Fund's units are suspended from trading by the ASX.

The Fund's units are no longer admitted to trading status on the ASX.

Mandatory TMD review periods

Review period	Maximum period for review
Initial review	NA – initial review has already occurred
Subsequent review	1 year and 3 months

Distributor reporting requirements

Reporting requirement	Reporting period	Which distributors this requirement applies to
Complaints (as defined in section 994A(1) of the Act) relating to the product design and distribution. The distributor should provide all the content of the complaint, having regard to privacy.	As soon as practicable but no later than 10 business days following end of calendar quarter.	All distributors
Significant dealing outside of target market, under section 994F(6) of the Act. See Definitions for further detail.	As soon as practicable but no later than 10 business days after distributor becomes aware of the significant dealing.	All distributors

If practicable, distributors should adopt the FSC data standards for reports to the issuer. Distributors must report to Platinum Investment Management Limited using the method specified www.platinum.com.au/Investing-with-Us/New-Investors and www.platinum.com.au/Investing-with-Us/New-Investors and www.platinum.com.au/Investing-with-Us/Existing-Investors and www.platinum.com.au/Investing-with-Us/Existing-with-Us

Disclaimer

Issued by Platinum Investment Management Limited ABN 25 063 565 006, AFSL 221935, trading as Platinum Asset Management ("Platinum"). Platinum is the responsible entity and issuer of units in the Fund referred to in this target market determination ("TMD"). Definitions

In some instances, examples have been provided below. These examples are indicative only and not exhaustive.

Term	Definition	
Consumer's investment objective		
Capital Growth	The consumer seeks to invest in a product designed or expected to generate capital return over the investment timeframe. The consumer prefers exposure to growth assets (such as shares or property) or otherwise seeks an investment return above the current inflation rate.	
Capital Preservation	The consumer seeks to invest in a product designed or expected to have low volatility and minimise capital loss. The consumer prefers exposure to defensive assets that are generally lower in risk and less volatile than growth investments (this may include cash or fixed income securities).	
Income Distribution	The consumer seeks to invest in a product designed or expected to distribute regular and/or tax-effective income. The consumer prefers exposure to income-generating assets (this may include high dividend-yielding equities, fixed income securities and money market instruments).	
Consumer's intended product use (%	of Investable Assets)	
Solution/Standalone (up to 100%)	The consumer may hold the investment as up to 100% of their total <i>investable assets</i> . The consumer is likely to seek a product with <i>very high</i> portfolio diversification.	
Major allocation (up to 75%)	The consumer may hold the investment as up to 75% of their total <i>investable assets</i> . The consumer is likely to seek a product with at least <i>high</i> portfolio diversification.	
Core Component (up to 50%)	The consumer may hold the investment as up to 50% of their total <i>investable assets</i> . The consumer is likely to seek a product with at least <i>medium</i> portfolio diversification.	
Minor allocation (up to 25%)	The consumer may hold the investment as up to 25% of their total <i>investable assets</i> . The consumer is likely to seek a product with at least <i>low</i> portfolio diversification.	
Satellite allocation (up to 10%)	The consumer may hold the investment as up to 10% of the total <i>investable assets</i> . The consumer may seek a product with <i>very low</i> portfolio diversification. Products classified as <i>extremely high</i> risk are likely to meet this category only.	
Investable Assets	Those assets that the investor has available for investment, excluding the residential home.	

Term	Definition	
Portfolio diversification (for completing the key product attribute section of consumer's intended product use)		
Note: exposures to cash and cash-like instruments may sit outside the diversification framework below.		
Very low	The product provides exposure to a single asset (for example, a commercial property) or a niche asset class (for example, minor commodities, crypto-assets or collectibles).	
Low	The product provides exposure to a small number of holdings (for example, fewer than 25 securities) or a narrow asset class, sector or geographic market (for example, a single major commodity (e.g. gold) or equities from a single emerging market economy).	
Medium	The product provides exposure to a moderate number of holdings (for example, up to 50 securities) in at least one broad asset class, sector or geographic market (for example, Australian fixed income securities or global natural resources).	
High	The product provides exposure to a large number of holdings (for example, over 50 securities) in multiple broad asset classes, sectors or geographic markets (for example, global equities).	
Very high	The product provides exposure to a large number of holdings across a broad range of asset classes, sectors and geographic markets with limited correlation to each other.	
Consumer's intended investment timeframe		
Minimum	The minimum suggested timeframe for holding the product. Typically, this is the rolling period over which the investment objective of the product is likely to be achieved.	
Consumer's Rick (ability to bear loss) and Return profile		

Consumer's Risk (ability to bear loss) and Return profile

This TMD uses the Standard Risk Measure (*SRM*) to estimate the likely number of negative annual returns for this product over a 20 year period, using the guidance and methodology outlined in the *Standard Risk Measure Guidance Paper For Trustees* (note the bands in the SRM guidance differ from the bands used in this TMD). However, SRM is not a complete assessment of risk and potential loss. For example, it does not detail important issues such as the potential size of a negative return (including under conditions of market stress) or that a positive return could still be less than a consumer requires to meet their investment objectives/needs. The SRM methodology may be supplemented by other risk factors. For example, some products may use leverage, derivatives or short selling; may have liquidity or withdrawal limitations; may have underlying investments with valuation risks or risks of capital loss; or otherwise may have a complex structure or increased investment risks, which should be documented together with the SRM to substantiate the product risk rating.

A consumer's desired product return profile would generally take into account the impact of fees, costs and taxes.

Term	Definition
Low	For the relevant part of the consumer's portfolio, the consumer:
	has a conservative or low risk appetite,
	• seeks to minimise volatility and potential losses (e.g. has the ability to bear up to 1 negative return
	over a 20 year period (SRM 1 to 2)), and
	• is comfortable with a low target return profile.
	The consumer typically prefers stable, defensive assets (such as cash).
Medium	For the relevant part of the consumer's portfolio, the consumer:
	 has a moderate or medium risk appetite,
	• seeks low volatility and potential losses (e.g. has the ability to bear up to 4 negative returns over a 20 year period (SRM 3 to 5)), and
	 is comfortable with a moderate target return profile.
	The consumer typically prefers defensive assets (for example, fixed income).
High	For the relevant part of the consumer's portfolio, the consumer:
	• has a high risk appetite,
	• can accept high volatility and potential losses (e.g. has the ability to bear up to 6 negative returns over a 20 year period (SRM 5 or 6)), and
	 seeks high returns (typically over a medium or long timeframe).
	The consumer typically prefers growth assets (for example, shares and property).
Very high	For the relevant part of the consumer's portfolio, the consumer:
, 8	• has a very high risk appetite,
	• can accept very high volatility and potential losses (e.g. has the ability to bear 6 to 7 negative returns over a 20 year period (SRM 6 or 7)), and
	 seeks to maximise returns (typically over a medium or long timeframe).
	The consumer typically prefers high growth assets (such as high conviction portfolios, hedge funds, and alternative investments).
Extremely high	For the relevant part of the consumer's portfolio, the consumer:
, 0	has an extremely high risk appetite,
	can accept significant volatility and losses, and
	 seeks to obtain accelerated returns (potentially in a short timeframe).
	The consumer seeks extremely high risk, speculative or complex products which may have features such
	as significant use of derivatives, leverage or short positions or may be in emerging or niche asset classes
	(for example, crypto-assets or collectibles).

Term	Definition
------	------------

Consumer's need to access capital

This consumer attribute addresses the likely period of time between the making of a request for redemption/withdrawal (or access to investment proceeds more generally) and the receipt of proceeds from this request under ordinary circumstances. Issuers should consider both the frequency for accepting the request and the length of time to accept, process and distribute the proceeds of such a request. To the extent that the liquidity of the underlying investments or possible liquidity constraints (e.g. ability to stagger or delay redemptions) could impact this, this is to be taken into consideration in aligning the product to the consumer's need to access capital. Where a product is held on investment platforms, distributors also need to factor in the length of time platforms take to process requests for redemption for underlying investments. Where access to investment proceeds from the product is likely to occur through a secondary market, the liquidity of the market for the product should be considered.

Term	Definition
Distributor Reporting	
Significant dealings	Section 994F(6) of the Act requires distributors to notify the issuer if they become aware of a significant dealing in the product that is not consistent with the TMD. Neither the Act nor ASIC defines when a dealing is 'significant' and distributors have discretion to apply its ordinary meaning.
	The issuer will rely on notifications of significant dealings to monitor and review the product, this TMD, and its distribution strategy, and to meet its own obligation to report significant dealings to ASIC.
	Dealings outside this TMD may be significant because:
	 they represent a material proportion of the overall distribution conduct carried out by the distributor in relation to the product, or
	 they constitute an individual transaction which has resulted in, or will or is likely to result in, significant detriment to the consumer (or class of consumer).
	In each case, the distributor should have regard to:
	 the nature and risk profile of the product (which may be indicated by the product's risk rating or withdrawal timeframes),
	• the actual or potential harm to a consumer (which may be indicated by the value of the consumer's investment, their intended product use or their ability to bear loss), and
	 the nature and extent of the inconsistency of distribution with the TMD (which may be indicated by the number of red and/or amber ratings attributed to the consumer).
	Objectively, a distributor may consider a dealing (or group of dealings) outside the TMD to be significant if:
	• it constitutes more than half of the distributor's total retail product distribution conduct in relation to the product over the quarter,
	 the consumer's intended product use is solution/standalone,
	 the consumer's intended product use is core component or higher and the consumer's risk/return profile is low, or
	• the relevant product has a green rating for consumers seeking extremely high risk/return.
