Appendix 4E

Preliminary final report

Listing Rule 4.3A

Company Platinum Capital Limited

ASX Code PMC

Year Ended 30 June 2008

ABN 51 063 975 431

Results for Announcement to the market

			\$A'000
Total investment income	down	-270.64%	(29,766)
Loss after income tax attributable to members	down	-361.89%	(23,861)
Net loss for the period attributable to members	down	-361.89%	(23,861)

This Annual Report is prepared under Australian International Financial Reporting Standards.

Under these recorded profits or losses will be much more variable, as changes in the market value of the Company's total assets are reflected through the profit and loss account.

The Company believes a more appropriate measure of its results is the change in its Net Asset Value, adjusted for dividends. The NAV is released monthly to the ASX and on the Company's web site.

Dividends

Recommended Final Dividend

Record date

Payable date

Last date for receipt of election notices for the dividend re-investment plan

5 cents per share fully franked
31 October 2008

14 November 2008
31 October 2008

An interim dividend of 5 cents per share fully franked was paid on 4 March 2008.

- Refer to the attached audited financial statements for financial data on the Company.
- Refer to the attached for Chairman's Report and Investment Manager's Report.

Dividend Reinvestment Plan

The Dividend Reinvestment Plan is in operation and the recommended Final Dividend of 5 cents per share qualifies. Participating shareholders will be entitled to be allotted the number of shares (rounded to the nearest whole number) which the cash dividend would purchase at the relevant issue price. The relevant issue price will be at a five percent discount on the prevailing stock market price (calculated as the average closing price over the five business days subsequent to the date on which the shares cease to trade cum dividend).

PLATINUM CAPITAL LIMITED

Chairman's Report 2008

Investment Performance

In the year ending on 30 June 2008, Platinum Capital's net asset value decreased by 17.2% pre-tax and by 13.8% after allowing for all tax liabilities, both realised and unrealised. For a comparison the benchmark Morgan Stanley Capital Index fell 19.8% for the 12 months.

This short-term performance should be seen in the context of the long-term results which are more than satisfactory. Since its inception in 1994 the compound annual appreciation of the Company's assets on a pre-tax basis has been 13.4% compared to the return from the MSCI of 5.9%. The comparable return from the Australian All Ordinaries Accumulation Index has been 11.5% annually over the 14 years.

Platinum Capital Limited – Pre-Tax NAV Return versus MSCI Index (%)					
	1 year	3 years (compound pa)	5 years (compound pa)	Since inception (14 years compound pa)	Since inception (cumulative)
PCL	-17.2	3.3	6.6	13.4	482.6
MSCI*	-19.8	2.1	5.3	5.9	122.4

Corporate Governance – International Accounting Standards

This Annual Report is prepared under Australian International Financial Reporting Standards, and therefore recorded profits or losses will be much more variable, as changes in the market value of the Company's total assets are reflected through the profit and loss account. This year we see realised profits of \$12.8m being booked together with an unrealised market value movement of -\$47.2m.

The longer-term movement of asset values, combined with the flow of dividends, is a better measure of the performance of a listed investment company.

Dividends

A fully franked final dividend of 5 cents per share is recommended making 10 cents for the full year. This is a reduction from last year when we paid a final of 10 cents per share making a total for that year of 15 cents. In the light of the unrealised losses incurred during the second half through the application of the accounting rule of marking to market, this final dividend represents a continuation of our policy of smoothing.

The Company is now is a position of having paid out virtually all of its retained earnings. Further dividend payments will, therefore, have to be entirely governed by future earnings.

Environment

The Manager continues to report that it is carbon neutral (as is your Company), having purchased carbon credits to offset its carbon emissions. The Manager reports that it has reduced its level of carbon emissions this year and strives toward further reductions.

Outlook for 2008 - 2009

The Manager makes it clear in its Report that whilst its "frequently expressed concerns about excessive liquidity, over-borrowing and the weak US Dollar all proved perceptive, we sometimes acted on them too early". The Manager currently has a high level of confidence in

owning "a group of very stable and well run companies whose valuations are well below their longer-term averages". It believes that, "We are relatively well-placed with our shorts in emerging markets, small caps and cyclicals".

Finally

As in past years, I do commend reading the Manager's Report for its insights and a better understanding of the depth of analysis behind the investment decisions made by the Manager.

Finally, I wish to express my appreciation of the efforts of the people at Platinum Asset Management along with those of my fellow Directors.

Graeme Galt Chairman

Platinum Capital Limited 30 June 2008 Investment Manager's Report

Performance

Markets have been very challenging since evidence of the excesses of the credit cycle first came to light in May 2007. In the most recent quarter there has been a division between those companies that are seen as beneficiaries of continued growth in the developing world and those that are on the receiving end of the credit unravelling. Stock markets have seen the commodity and resource producers continue to roll while the financials have slumped.

A clear distinction has been less evident at the country level where the developed and developing markets have moved in similar ways. Striking exceptions were Brazil and Russia, where energy and resources predominate, with companies like Vale, Petrobras and Gazprom soaring. China and India have lost their lustre to tightening credit and inflation pressures.

Tables of global regional and sector returns are shown below.

Region	Quarter	1 Year
United Kingdom	-6%	-23%
India	-24%	-23%
Korea	-12%	-23%
US	-7%	-23%
Japan	-3%	-22%
France	-9%	-22%
Germany	7%	-17%
Australia	-1%	-14%
Hong Kong	-9%	-9%
Emerging Markets	-6%	-8%
Brazil	13%	36%

Energy	12%	9%	
* Morgan Stanley Capital International			
Source: MSCI			

Your Company's performance has fluctuated. While doing better than the MSCI World Index for the year at -17.2% (pre-tax) versus -19.8%, our absence from resource companies and our currency allocation were detrimental to performance over the last three months (-8.7% pre-tax versus -6.4% for the index). As regard currencies, had we joined the momentum brigade and loudly proclaimed "stronger for longer" over this period we would have done better. This slogan is likely to be tested in coming months but recently it has held the Australian dollar, where we are underweight, high. It

has also reduced the potency of our shorts. While underlying stocks in Japan are showing resilience the currency has sold-off.

The following Platinum Net Asset Value figures (cps) are after provision for tax on both realised and unrealised income and gains.

30 April 2008	31 May 2008	30 June 2008
138.81	138.17	128.69

Currencies

While the Yuan continued its climb, rising by 10% versus the US dollar over the year, the other Asian currencies lost momentum and those without natural protection against the rising oil price started to sag. This was detrimental to our position as we had expected them to move-up with the Yuan so these holdings have now been cut. Further, the Australian dollar tilted higher as investors paid more heed to revised expectations about this country's current account deficit in the light of its strong iron ore, coal and natural gas industries. We ended the quarter with only 8% long the Australian dollar and with most of our physical share holdings being carried in their underlying currencies. We remain of the view that the US dollar is bottoming, perverse as this may seem, as competitiveness is now trending in that currency's favour.

Shorting

Throughout the quarter we have progressively moved the shorts towards those areas that are bloated by expectations of growth. These include some emerging markets such as Brazil, steel companies, small caps and reits (real estate investment trusts); only in the last days of the quarter did these bastions of hope for growth start to fall, a movement which has accelerated into July.

Source: Platinum				

Strong relative moves during the quarter gave us the opportunity to rebalance several holdings. In particular we cut back on our positions in the Bank of China, Sony and Bombardier, all of which rose by 20 to 30%. We consolidated holdings by selling Oracle for more SAP (IT business systems) and Chiyoda for more JGC (constructors of refineries and LNG plants). In other cases we exited companies that had held-up relatively well but which now look less attractive in a relative sense; Ajinomoto, Yamato and Rohm were used to fund initial stakes in the highly oil-punished segment of airlines and aircraft support. Other activities were to exchange Pfizer for Sanofi-Aventis and to sell the regional banks in Japan for the two largest city banks.

At a time when most banks have been revealed as under-capitalised and having weak deposit bases, one of the world's biggest banks with the opposite characteristics, is selling at book value. Mitsubishi-UFJ Financial Group has been recapitalised and has a loan to deposit ratio of 75%. Furthermore, for the first time in years it is trading in an environment of rising prices and has the prospect of repricing and expanding its loan book at relatively low risk. In addition, the completion of its IT integration is anticipated to give rise to substantial cost savings. Should the Japanese public change their stance to equities in the face of a deteriorating environment for bonds, the company would get the additional boost from transactional fees and commissions. There is little need to try to pick the low point of the share prices of the western financials when this stock is both

cheaper and more soundly based.

The pharmaceutical sector is being punished due to concerns about gaps in the pipeline for new drugs. Sanofi-Aventis has been caught up in this general downgrading and is trading at under eight times earnings. If you strip out the safe and steady vaccine business, the balance of activities is capitalised at approximately Eu43bn which should be covered by cash flow from those activities over no more than the next five years. The R&D pipeline, into which the company has recently been investing between Eu4.5bn and Eu8bn annually, is apparently being valued by the market at zero. There are other good things to be said but the above figures alone are a sufficient indication that Sanofi's current rating is strongly characteristic of value and neglect.

Commentary

Trying to evaluate markets each day is like watching a giant kaleidoscope. Against a dull background there will nearly always be one vividly bright and interesting sector. For a while this particular area generates a massive volume of comment accompanied by extraordinary market activity and volatility. Then, more or less unexpectedly, a new brilliance merges to command attention while the old one fades away.

We do our very best to avoid short-termism and to maintain a balanced view. We are obliged, however, because we necessarily interact with the other market participants, constantly to take account of the intensity and likely durability of the mass reaction to each emergent spectacular. Last week it was securitisation, credit default swaps and bank solvency. This week it is oil and agriculture prices and inflation. Next week, well, that is the big question.

It is a constant balancing act. How much attention should be paid to the past, to what extent can we anticipate the future and when and by how much do we deweight the present but transient?

Many fund managers would today be concerned about whether they have "enough exposure to oil plays". The trouble here is that oil has doubled in the last 12 months. We in fact first wrote about the impending boom in the oil price in June 2003 (http://www.platinum.com.au/images/drops.pdf). It is not really "breaking news". Nevertheless, if one were a momentum fund manager it would bear heavily on one's behaviour. The skill we require is to correctly gauge the tone of the market as we buy or sell the shares that we do or don't favour, while neither being too anticipatory nor too hesitant.

At present the market's focus seems to be on:

Growth

Developed economies are slowing to a snail's pace. Developing markets continue to grow but are threatened by rising inflation and, in some cases, the adverse effects of "managed" currencies.

<u>Inflation</u>

The deflationary pulse from China/Asia is reversing. There have been some unpleasant surprises regarding input costs and the movements of wages in Asia/Russia and other developing regions. Agricultural prices may ease but, on account of the fundamental repricing of energy, it is unlikely that they will fall back below the current trading range. Energy prices should stay elevated as demand destruction in developed countries (eg. dramatic shifts to public transport and other measures) is offset by developing world growth. There is very little tolerance in global supply to cope with incidents such as the Japanese nuclear generator fleet being taken offline, causing extra demand for oil of 350,000 barrels per day.

Profits

Forward earnings are likely to sag in the face of weaker demand and strong cost pressures.

Credit

Banks are being recapitalised but the magnitude of the write-offs are causing boards to tighten credit standards and we can expect regulatory oversight to stiffen. Re-intermediation will continue and securitisations will be much rarer.

What is coming into view?

Accelerating inflation rests partly on the effects of currency intervention and the consequent massive build-up of foreign exchange reserves in Asia, Russia and the Middle East. Some of this has been sterilised by way of the issue of domestic bonds, but not in sufficient quantities to offset fully the expansionary effect on money supply. Currency intervention will be a hot topic. Note that in China the government still sets both the maximum rate on deposits and the minimum rate on loans. This has allowed the banks to recapitalise themselves but now, via special reserve requirements, these set rates are throttling the ability to lend to the extent that the credit multiplier has shrunk to about 5.5 times.

Subsidies are also likely to receive more press. These are widespread across Asia. Apart from the interest rate subsidy noted above, there are the issues of tax rebates, now being phased out in China, subsidised motor fuels, natural gas prices, electricity prices, fertilisers and so on across the developing world. In the case of India these subsidies are exploding with the rise in the prices of hydrocarbons and food and now, at 5% of the economy, threaten the central government's finances.

Inflation is starting to really frighten many Asian regimes, with recorded rates ranging between 7% and 14%. They are beginning to recognise the need to allow the true market price to ration the demand for basic necessities and to allocate resources more appropriately. This will likely lead to a change in perception about the risk of emerging markets. In the case of last year's top favourite, Vietnam, the stock market has already halved in the face of concerns about inflation at 25%, the weakening Dong, and the foreign borrowings of some state owned enterprises and banks.

A growing concern about developing markets is likely to re-establish the risk premium at higher levels. As we all know, the attraction of superior growth had completely changed investors' risk/reward perceptions such that there was little difference in the rating of emergent and developed markets. Some of this new-found faith was always questionable in the case of the resource-rich countries. It was precisely because of their natural resource wealth that their political regimes were intolerant and restricted the development of strong institutions. The natural extension of this has been a trend towards resource nationalism - hardly reassuring to owners of capital.

There is likely to be more attention to corporate earnings. Broker analysts have still barely revised their earnings estimates for the next financial year. The majority of fund managers do not believe the analyst consensus of low teens earnings growth but we are still being told that things will improve in the second half of 2008 although we're here now and it doesn't look great.

As a general statement, we can argue that equity markets are most happy when inflation is around 2%. Less than that and companies are in the difficult position recently experienced by the Japanese. Customers are highly sensitive to price increases and it is often better to absorb the pressure of costs than to lose sales from "sticker-shock". However, as inflation rises to higher levels it progressively erodes the valuation of equities. This is so for several reasons, particularly the diminished availability of credit and the effect of taxation on illusory profits. Hence, as concerns about inflation become embedded, the price investors will pay for forward earnings starts to drop.

Should this concern begin to manifest itself, fund managers will start to look for those companies that are relatively protected from inflation. This could lead to defensive, non-capital intensive businesses being favoured over those which are pure price takers and have a lot of money tied up in plant and working capital. For example, food retailers would look very good versus steel mills.

Looking slightly further out, we believe we are approaching the cross-over point where spending patterns will shift. In the West we anticipate savings will rise at the expense of consumption whilst correcting the backlog of investment in public infrastructure plus the need to address alternative energy sources and conservation will also make a positive contribution. We expect the reverse in China and most of Asia, excluding India, where savings will begin to make way for consumption. China is at the extreme where investment and the trade surplus dwarf the consumer, so that one is inclined to believe there will be some painful adjustments as an appreciating exchange rate takes its toll. This may well become an important issue when constructing portfolios in the next few years.

In the last three years Platinum has displayed a pattern of being too preemptive in both its long and short positions. He who wants to be ahead of the crowd undoubtedly runs the risk of acting too early. Our frequently expressed concerns about excessive liquidity, over-borrowing and the weak US dollar all proved perceptive. All those factors did, however, take longer

than we anticipated to have their impact which caused us to fail to capture some opportunities.

We are now barely exposed to energy and resources, except pulp and paper. Instead, we are positioning the portfolio for the inevitable burst of activity in creating alternative fuels and the whole investment program this will entail. We own a group of very stable and well-run companies whose valuations are well below their longer-term averages. We have little doubt that there will be some earnings declines but believe that prospective valuations are already anticipating a weak outlook.

Outlook

There are plenty of issues for the market to worry about. Consumers everywhere are feeling the pinch of rising costs, principally for food in the poorer countries and energy in the richer ones. Among the richer countries there is also a housing slump, tighter credit and the real prospect of a significant number of lay-offs. As we have been saying for a while, companies face reduced pricing power and higher input costs.

Investors are well aware that the stock market is an anticipatory mechanism. The conundrum is to assess the degree to which current prices already reflect a miserable outlook. Our view is that the magnitude and length of the boom was such that investors probably still view the future with a slightly rose-tinted blush. Unlike the "tech wreck" of 2001, at the peak of this boom there were few places to hide because of a convergence of valuations. The good were cheaper than the bad but not cheap enough to deal with profit downgrades. This is rapidly changing and those companies with the qualities we sought and highlighted last year, namely prominent business positions that support pricing power; no or low debt; margins close to trend and valuations below their historic average, now represent good absolute value.

We are relatively well-placed with our shorts in emerging markets, small caps and cyclicals. Prices in each of these sectors started to fall sharply in the early days of July.

SHAREHOLDER INFORMATION

Substantial Shareholders

No Shareholders appeared in the Company's Register of Substantial Shareholders, maintained in accordance with section 671B of the *Corporations Act 2001*, as at 4 August 2008.

Voting Rights

Ordinary Shares

On a show of hands, every member present in person or represented by a proxy or representative shall have one vote and on a poll every member who is present in person or represented by a proxy or representative shall have one vote for every share held by them.

Platinum's Commitment to Carbon Neutrality

The Manager continues to report that it is carbon neutral (as is your Company), having purchased carbon credits to offset its carbon emissions. The Manager reports that it has reduced its level of carbon emissions this year and strives toward further reductions.

Distribution of Annual Report to Shareholders

The Law allows for an "opt in" regime in which shareholders will only receive a printed "hard copy" version of the Annual Report if they request one.

The Directors have decided to mail out the 2008 Annual Report to all Shareholders, unless they have "opted out".

This position will be kept under review. Please communicate your views to the Company Secretary by email to invest@platinum.com.au.

Financial Calendar

Annual General Meeting
Ordinary Shares trade ex-dividend
Record (books close) date for final dividend
Final dividend paid
These dates are indicative and may be changed.

Questions at AGM

If you would like to submit a question prior to the AGM to be addressed at the AGM, you may email your question to invest@platinum.com.au.

Investment Methodology

Platinum Capital Limited is an investment company listed on the Australian Securities Exchange and open to investors who wish to purchase shares in the same way as one might buy shares in NAB or BHP. Platinum Capital is taxed at source and pays Shareholders dividends (usually fully franked). This feature distinguishes it from unit trust products.

Platinum Capital delegates the investment function to Platinum Investment Management Limited (trading as Platinum Asset Management). This entity employs an investment team that manages the investments of Platinum Capital. These are two discrete legal entities.

As a shareholder in Platinum Capital you have no interest/ownership in Platinum Investment Management Limited or its listed parent, Platinum Asset Management Limited.

Platinum Asset Management's investment process has been well-tested over time. The principles on which it is based have not varied since inception although refinements continually evolve and develop.

Platinum Asset Management seeks a broad range of investments whose businesses and growth prospects are being inappropriately valued by the market. By using themes and an industry focus, the portfolio is built up through individual stock selection. Consideration of the macro environment as well as careful evaluation of how the stock will fit and function in the portfolio are also important.

By locating the research efforts together in one place Platinum Asset Management facilitates the cross pollination of ideas that is possible with the free-flow of information between managers with different geographic and industry responsibilities. It has the further benefit that distance acts as a filter and calming influence enabling a more objective assessment of "noisy" markets. This process is well supported by carefully planned and extensive visits to companies and key areas.

The wealth of research and detailed analysis that leads to the consideration of a stock addition/retention/reduction in a portfolio takes form in a disciplined reporting process that is open to the critical scrutiny of divergent thinking peers. This process serves to challenge and encourage analysts and to "test" the investment decision as well as add accountability to the process. Implementation of investment decisions is also given detailed attention as is the on-going review and monitoring of the portfolio.

For a more detailed look at Platinum Asset Management's investment process we would encourage you to visit Platinum's website at the following links:

www.platinum.com.au/invest_process.htm

www.platinum.com.au/invest_diagram.htm

DIRECTORS' REPORT

In respect of the year ended 30 June 2008, the Directors of Platinum Capital Limited (the "Company") submit the following report made out in accordance with a resolution of the Directors.

Directors

The following persons were Directors of the Company during the whole year and up to the date of this report.

Graeme Galt (Chairman and Non-Executive Director)

Peter Clarke (Non-Executive Director)
Bruce Coleman (Non-Executive Director)
Kerr Neilson (Managing Director)
Andrew Clifford (Director)

Malcolm Halstead (Director and Secretary)

Principal Activity

The principal activity of the Company during the year was the investment of funds internationally into securities of companies, which are perceived by the Investment Manager to be undervalued.

Trading Results

The net loss of the Company for the year was \$23,861,000 (2007:net profit \$9,111,000) after income tax benefit of \$10,419,000 (2007:income tax expense \$3,456,000).

Dividends

Since the end of the financial year, the Directors have recommended the payment of a 5 cents per share (\$6,358,000) fully franked dividend payable to Shareholders on 14 November 2008.

A fully franked interim dividend of 5 cents per share (\$6,295,000) was paid on 4 March 2008.

A fully franked final dividend of 10 cents per share (\$12,400,000) for the year ended 30 June 2007 was paid on 14 November 2007.

Review of Operations

The net loss before tax was \$34,280,000 (2007:net profit before tax \$12,567,000) and net loss after tax was \$23,861,000 (2007:net profit after tax was \$9,111,000). Income tax benefit for the year was \$10,419,000 (2007:income tax expense \$3,456,000).

Changes in the State of Affairs

There were no significant changes in the state of affairs of the Company that occurred during the year not otherwise disclosed in this report or the financial statements.

Events Subsequent to the end of the Financial Year

Since the end of the financial year, the Directors are not aware of any matter or circumstance not otherwise dealt with in this report or financial statements that has significantly or may significantly affect the operations of the Company, the results of those operations or the state of affairs of the Company in subsequent financial periods.

Likely Developments and Expected Results of Operations

The Company will continue to pursue its investment objective which is to increase the net asset value of the Company. The methods of operating the Company are not expected to change in the foreseeable future.

Rounding of Amounts

The Company is of a kind referred to in the Australian Securities & Investments Commission's Class Order 98/0100 (as amended) and consequently amounts in the Directors' Report and financial statements have been rounded to the nearest thousand dollars in accordance with that Class Order, unless otherwise indicated.

Environmental Regulation

The Company is not subject to any particular or significant environmental regulations under a Commonwealth, State or Territory Law.

Auditor

PricewaterhouseCoopers continues in office in accordance with section 327 of the Corporations Act 2001.

DIRECTORS' REPORT (Cont.)

Non-Audit Services

Details of the amounts paid or payable to the Auditor (PricewaterhouseCoopers) for audit and non-audit services provided during the year are set out below.

The Directors, in accordance with advice received from the Audit Committee, are satisfied that the provision of non-audit services is compatible with the general standard of independence for auditors imposed by the *Corporations Act 2001*. The Directors are satisfied, considering the nature and quantum of the non-audit services, that the provision of non-audit services by the Auditor, as set out below, did not compromise the auditor independence requirements of the *Corporations Act 2001*.

	2008 \$	2007 \$
Audit services - statutory	84,319	76,480
Taxation services - compliance	42,903	29,740
Taxation services - Foreign tax agent	9,139	2,955
Taxation services - advice	-	2,333
Total	136,361	111,508

Auditor's Independence Declaration

A copy of the Auditor's Independence Declaration as required under section 307C of the Corporations Act 2001 is set out on page 8.

Information on Directors

Graeme Galt MBA, BCom

Independent Non-Executive Director and Chairman for six years and member of the Audit Committee. (Age 68) Mr Galt has extensive experience in senior line and staff roles, and in consulting positions across a wide range of industries and markets. He has held various directorships in both private and public companies.

Peter Clarke BSc(Econ)

Independent Non-Executive Director for nine years and Chairman of the Audit Committee. (Age 72) Mr Clarke brings to the Board over 30 years experience in the Investment Management business. Until 1987 he held various directorships in the UK and was Managing Director of a stockbroking firm.

Bruce Coleman BSc, BCom, CA, FFin

Independent Non-Executive Director for four years and member of the Audit Committee. (Age 58) Mr Coleman has worked in the Finance and Investment industry since 1986. He was the CEO of MLC Investment Management from 1996 to 2004. He has held various directorships within MLC Limited, Lend Lease and the National Australia Banking group. Former Director of MLC Limited from 2001 to 2004.

Mr Coleman is a Non-Executive Director of Platinum Asset Management Limited.

Kerr Neilson BCom (UCT), ASIP

Managing Director for 14 years. (Age 58)

Relevant interest in 324,020 shares in the Company.

Appointed as Managing Director upon incorporation. He is the Managing Director of Platinum Investment Management Limited, the Company's Investment Manager and Platinum Asset Management Limited.

Prior to Platinum, Mr Neilson was an Executive Vice President at Bankers Trust Australia Limited.

Previously he worked in both the UK and South Africa as an investment analyst and fund manager.

Andrew Clifford BCom(Hons) (UNSW)

Director for 14 years. (Age 42)

Relevant interest in 81,004 shares in the Company.

Appointed a Director of the Company upon incorporation. He is a Director of Platinum Investment Management Limited, the Company's Investment Manager. Prior to Platinum Investment Management Limited, Mr Clifford was a Vice President at Bankers Trust Australia Limited.

Malcolm Halstead CA

Finance Director and Company Secretary for 14 years. (Age 50)

Relevant interest in 64,804 shares in the Company.

Appointed a Director of the Company upon incorporation. He is a Director of Platinum Investment Management Limited, the Company's Investment Manager and a Director of Platinum Asset Management Limited and a Non Executive Director of White Rabbit Gallery Limited. Prior to Platinum, Mr Halstead was a Vice President at Bankers Trust Australia Limited. Previously he was with Price Waterhouse, Sydney and Jolliffe Cork, London.

DIRECTORS' REPORT (Cont.)

Directors' Meetings

The following table sets out the number of meetings held and attended by the Company's Directors during the year ended 30 June 2008.

	Boar	d Meetings	Audit Comr	nittee Meetings
	Held	Attended	Held	Attended
	while	a Director	while	a member
G Galt	6	6	3	3
P Clarke	6	5	3	3
B Coleman	6	6	3	3
K Neilson	6	5	-	-
A Clifford	6	6	-	-
M Halstead	6	6	-	-

Remuneration Report (audited)

Principles used to determine the nature and amount of remuneration

The Executive Directors review and determine the remuneration of the Non-Executive Directors and may utilise the services of external advisors. It is the policy of the Board to remunerate at market rates commensurate with the responsibilities borne by the Non-Executive Directors. The remuneration of the Directors is not linked to the performance or earnings of the Company.

Directors' fees

Non-Executive Directors' base remuneration is reviewed annually.

Retirement benefits for Directors

No retirement benefits (other than mandatory superannuation) are provided to Directors.

Other benefits (including termination) and incentives

No other benefits and incentives are paid to Directors.

Details of Remuneration

The Executive Directors (K Neilson, A Clifford and M Halstead) are all employees of the Investment Manager, Platinum Investment Management Limited, and are not remunerated by the Company. The Non-Executive Directors received the following amounts from the Company during the financial year:

	Short-term Benefits	Post-employment Benefits	
	Salary	Superannuation	Total
Name	\$	\$	\$
G Galt	55,000	4,950	59,950
P Clarke	50,000	4,500	54,500
B Coleman	50,000	4,500	54,500
Total remuneration	155,000	13,950	168,950

AASB 124: Related Party Disclosures defines key management personnel as "persons having authority and responsibility for planning, directing and controlling activities of the entity". The only employees that have this authority and responsibility are the Directors of Platinum Investment Management Limited.

Directors

The following persons were Directors of Platinum Investment Management Limited during the whole of the financial year and up to the date of this report:

K Neilson

A Clifford

M Halstead

There are no employees who hold an executive position within Platinum Investment Management Limited.

Key management personnel compensation

The Executive Directors (K Neilson, A Clifford and M Halstead) are all employees of the Investment Manager, Platinum Investment Management Limited, and are not compensated by the Company. AASB 124 requires compensation provided by the Company or on behalf of the Company to be disclosed. Platinum Investment Management Limited is a related entity of the three Executive Directors, because the Executive Directors are also Directors of Platinum Investment Management Limited which provides investment management services to the Company.

A portion of the compensation paid by Platinum Investment Management Limited to its employees is in relation to managing the affairs of the Company. Platinum Investment Management Limited has not made any determination as to what proportion of its employees' compensation relates to the Company. Platinum Investment Management Limited paid: K Neilson a salary of \$313,132 (2007:\$207,575) and superannuation of \$99,997 (2007:\$105,111); A Clifford a salary of \$313,130 (2007:\$220,302), superannuation of \$49,999 (2007:\$42,384) and non-monetary benefits \$nil (2007: \$3,415); M Halstead a salary of \$313,130 (2007:\$250,000), and superannuation of \$49,999 (2007:\$12,686).

DIRECTORS' REPORT (Cont.)

Share Holdings

In the Company, the number of Ordinary Shares in which the Directors have a relevant interest at balance date is as follows:

Name	Balance at 01/07/07	Acquisitions	Disposals	Balance at 30/06/08
K Neilson	324,020	-	-	324,020
A Clifford	81,004	-	-	81,004
M Halstead	64,804	-	-	64,804

Service Agreements

Remuneration and other terms of employment for the Non Executive Directors are formalised in service agreements. The Executive Directors do not have service agreements, as they are employees of the Investment Manager, Platinum Investment Management Limited.

G Galt, Chairman and Non-Executive Director

- Commenced on 25 July 2002.
- No term of agreement has been set unless the Director is not re-elected by Shareholders of the Company.
- Base salary, inclusive of superannuation, for the year ended 30 June 2008 of \$59,950.

P Clarke, Non-Executive Director

- Commenced on 15 April 1999.
- No term of agreement has been set unless the Director is not re-elected by Shareholders of the Company.
- Base salary, inclusive of superannuation, for the year ended 30 June 2008 of \$54,500.

B Coleman, Non-Executive Director

- Commenced on 10 June 2004.
- No term of agreement has been set unless the Director is not re-elected by Shareholders of the Company.
- Base salary, inclusive of superannuation, for the year ended 30 June 2008 of \$54,500.

Share Based Compensation

No shares or options are granted to Directors.

Directors' Interests in Contracts

The three Executive Directors are employees of and have a relevant interest in the Investment Manager and accordingly will receive a portion of the Management fee. They do not receive any Directors' remuneration from the Company.

Directors' Insurance

During the year, the Company incurred a premium in respect of a contract for indemnity insurance for the Directors and Officers of the Company named in this report.

Executives

The Company has no employees or executives other than the Directors.

This report is made in accordance with a resolution of the Directors.

Auditor's Independence Declaration

As lead auditor for the audit of Platinum Capital Limited for the year ended 30 June 2008, I declare that to the best of my knowledge and belief, there have been:

- a) no contraventions of the auditor independence requirements of the Corporations Act 2001 in relation to the audit: and
- b) no contraventions of any applicable code of professional conduct in relation to the audit .

This declaration is in respect of Platinum Capital Limited during the period.

Corporate Governance Statement

The Company is a listed investment company. Its shares are traded on the Australian Securities Exchange (" ASX").

The objective of the Company is to seek long term capital growth through utilising the skills of the Investment Manager,

Platinum Investment Management Limited ABN 25 063 565 006 AFSL 221935 which trades as "Platinum Asset Management".

Other than its Directors, the Company has no employees. It has no premises, plant or equipment or other physical assets. The Company's day-to-day affairs are managed by Platinum Asset Management in accordance with an Administrative Services Agreement. The Company's investment activities are undertaken by Platinum Asset Management in accordance with an Investment Management Agreement.

The Company's main corporate governance practices are set out below and, unless otherwise stated, were in place for the entire year.

The Company has followed the ASX Corporate Governance Council's Corporate Governance Principles and

Recommendations ("Governance Principles"), except where indicated.

Company policies, charters and codes referred to in this Statement are provided on the Company's website at www.platinumcapital.com.au ("Company's website").

1.The Board of Directors

G Galt (Chair)

P Clarke

B Coleman

K Neilson

A Clifford

M Halstead

The Board operates in accordance with its Charter - a copy is available from the Company's website.

The Charter details the functions and responsibilities of the Board.

1.1 Role of the Board

The role of the Board is to ensure:

- . the appointed Investment Manager is performing its duties in a skilful and diligent manner,
- employs qualified and experienced staff and operates appropriate risk monitoring and
- compliance procedures; and
- . the Company operates in compliance with its regulatory environment and good corporate governance practices are adopted.

1.2 Responsibilities of the Board

The principal responsibilities of the Board include:

- $. \ overseeing \ and \ monitoring \ Platinum \ Asset \ Management's \ compliance \ with \ the \ terms \ of \ the \ Investment \ Management \ Agreement;$
- . monitoring the Company's financial performance;
- . identifying, controlling and monitoring material risks faced by the Company (including those associated with its compliance obligations) and ensuring appropriate reporting mechanisms are in place; and
- . overseeing communications and reporting to shareholders.

1.3 Composition of the Board

The Board comprises three Executive Directors (K Neilson, A Clifford and M Halstead) and three Non-Executive Directors

(G Galt, P Clarke and B Coleman). The qualifications and experience and term of the Directors are provided in the Directors' Report on page 5.

The Board has determined (according to the criteria summarised below) that G Galt (the Chair of the Board), P Clarke and B Coleman are "independent" Non-Executive Directors.

Recommendation 2.1 of the Governance Principles provides that "a majority of the board should be independent directors".

The Board has determined that, given the size of the Company and its specialised nature, an "equal" representation is more appropriate.

Director Independence

In consideration of the Governance Principles, the Board defines an "independent director" to be a person who:

- . is not a substantial Shareholder of the Company or an officer of, or otherwise associated directly with, a substantial Shareholder of the Company;
- . has not, within the last three years been employed in an executive capacity by the Company, or been a Director after ceasing to hold any such employment;
- . has not within the last three years been a principal of a material professional adviser or material consultant to the Company, or an employee materially associated with the service provider;
- . is not a material supplier or customer of the Company, or an officer of or otherwise associated directly or indirectly with a material supplier or customer;
- . has no material contractual relationship with the Company other than as a Director of the Company;
- . has not served on the Board for a period which could, or could reasonably be perceived to, materially interfere with the Director's ability to act in the best interests of the Company; and
- is free from any interest and any business or other relationship which could, or could reasonably be perceived to, materially interfere with the Director's ability to act in the best interests of the Company.

The Board determines "materiality" on both a quantitative and qualitative basis. An item that affects the Company's turnover by more than 0.5% is likely to be material.

However, this quantitative measure is supplemented with a qualitative examination, as the facts and the context in which the item arises will influence the determination of materiality.

1.4 Chair of the Board and Managing Director (CEO)

The roles of the Chair and Managing Director are separate roles to be undertaken by different people.

The Chair is responsible for leading the Board, ensuring that the Board's activities are organised and efficiently conducted and for ensuring Directors are properly briefed for meetings.

The Managing Director is responsible for ensuring the Investment Manager and Administrator, Platinum Asset Management, complies with the terms of the Investment Management and Administrative Services Agreement.

Corporate Governance Statement (continued)

1.5 Recommendation 2.4 - Establishment of a Nomination Committee

Recommendation 2.4 of the Governance Principles provides that "the board should establish a nomination committee". Such a committee is mandated with reviewing, assessing and recommending changes to the company's process for evaluating, selecting and appointing directors.

Given the size of the Company and the Board, the Board considers a nomination committee is not warranted. The entire Board undertakes the role.

The Board considers the following when evaluating, selecting and appointing Directors:

- the candidate's competencies, qualifications and expertise and his/her fit with the current membership of the Board;
- the candidate's knowledge of the industry in which the Company operates;
- directorships previously held by the candidate and his/her current commitments to other boards and companies;
- existing and previous relationships with the Company and Directors;
- the candidate's independence status and the need for a majority balance on the Board; and
- requirements of the Corporations Act 2001, ASX Listing Rules, the Company's Constitution and Board Policy.

The Board seeks to ensure that:

- its membership represents an appropriate balance between Directors with investment management experience and Directors with an alternative perspective; and
- the size of the Board is conducive to effective discussion and efficient decision-making.

1.6 Director Term of Office

The Company's Constitution specifies that all Directors, other than the Managing Director, must retire from office no later than the third Annual General Meeting ("AGM") following their last election and that one-third of the Directors are to retire from office at each AGM. Where eligible, a Director may stand for re-election.

1.7 Independent Professional Advice

The Board of Directors' Charter provides that the Directors may seek independent professional advice at the Company's expense, after first notifying the Board. The Board will review the estimated costs for reasonableness, but will not impede the seeking of advice.

1.8 Performance Assessment

The Board undertakes an annual self assessment of its collective performance, as well as the performance of its committees.

The Board reviews its performance in terms of Company objectives, Company results and achievements of the Investment Manager.

The Board ensures each director has the necessary skills, experience and expertise, and the mix remains appropriate for the Board to function

effectively. This assessment was undertaken during August 2008.

Independent professional advice may be sought as part of this process.

Principle 1.2 of the Governance Principles provides that "companies should disclose the process for evaluating the performance of senior executives".

Given the Company has no senior executives other than the Executive Directors of the Board and the Executive Directors are not remunerated by the Company, it is considered appropriate that their performance be assessed as part of the collective review outlined below.

2. Board Committees

The Board may establish committees to assist in the execution of its duties and to allow a detailed consideration of complex issues.

To date, the Board has only found a need to establish an Audit Committee.

2.1 Audit Committee

The Audit Committee consists of three Non-Executive and 'independent' Directors: P Clarke (Chair of the Committee), G Galt, and B Coleman.

Each member of the Committee has the appropriate financial expertise and industry understanding to perform his role. B Coleman is a Chartered Accountant, and P Clarke and G Galt are finance professionals. A summary of the Directors' qualifications and attendance at Audit Committee meetings is provided in the Directors' Report.

The Audit Committee operates according to its Charter, which is available from the Company's website.

The Charter sets out its role and responsibilities, composition, structure, membership requirements and the manner in which the Committee is to operate.

The principal role of the Committee is to assist the Board in fulfilling its responsibilities relating to the financial reporting and accounting practices of the Company. Its key responsibilities are to:

- review and recommend to the Board, the financial statements (including key financial and accounting principles adopted by the Company);
- assess and recommend to the Board the appointment of external auditors;
- monitor the conduct of audits;
- monitor the Company's compliance with its statutory obligations;
- review and monitor the adequacy of management information and internal control systems; and
- ensure that any Shareholder queries relating to such matters are dealt with expeditiously.

All matters determined by the Committee are submitted to the full Board as recommendations for Board decisions. Minutes of a Committee meeting are tabled at the subsequent Board meeting. Additional requirements for specific reporting by the Committee to the Board are addressed in the Charter.

2.2 Recommendation 8.1 - Establishment of a Remuneration Committee

Recommendation 8.1 of the Governance Principles provides that "the board should establish a remuneration committee". Such a Committee is mandated with reviewing and recommending remuneration, incentive and employment policies for executive directors, other senior executives and non-executive directors.

Given the size of the Company and the fact that the Executive Directors are not remunerated by the Company, the Board has determined that a remuneration committee is not needed.

Remuneration Policies

Remuneration for the Non-Executive Directors is set at market rates commensurate with the responsibilities borne by the Non-Executive Directors.

The Executive Directors review and determine the remuneration of the Non-Executive Directors accordingly. Independent professional advice may be sought. Further information is provided in the Remuneration Report.

Remuneration Paid

Remuneration Paid to the non-Executive Directors for the 2007/2008 reporting year is set out on page 6 and 7 of the Directors' Report.

Corporate Governance Statement (continued)

3. External Auditors

The Company's policy is to appoint external auditors who clearly demonstrate quality and independence.

The performance of the external auditor is reviewed annually and applications for tender of external audit services are requested as deemed appropriate,

taking into consideration assessment of performance, existing value and tender costs.

PricewaterhouseCoopers was appointed as the external Auditor to the Company in 1994.

It is PricewaterhouseCoopers policy to rotate audit engagement partners on listed companies at least every five years.

An analysis of fees paid to the external Auditor, including a break-down of fees for non-audit services, is provided in the Directors' Report.

It is the policy of the external Auditor to provide an annual declaration of its independence to the Audit Committee.

The external Auditor will attend the Company's AGM and be available to answer Shareholder questions about the conduct of the audit and the preparation and content of the Audit Report.

4. Company Policies

4.1 Directors' Code of Conduct

The Board has adopted a Directors' Code of Conduct which is based upon the Australian Institute of Company Directors' Code of Conduct.

It requires the Directors to act honestly, in good faith, and in the best interests of the Company as a whole, whilst in accordance with the letter (and spirit) of the law. A copy of the Directors' Code of Conduct is available from the Company's website.

4.2 Trading in Company Securities

The purchase and sale of shares in the Company by Directors is only permitted during a period of five business days following the Company's release of its monthly net tangible assets figure to the ASX. Additional blackout periods are enforced as necessary

(e.g. during an on-market buy-back of shares on issue). Any and all changes to Director shareholdings are reported to the ASX.

The Investment Manager, Platinum Asset Management, imposes the same rules on itself and its employees.

A copy of the Share Trading Policy is available from the Company's website.

4.3 Financial Reporting

In respect of the year ended 30 June 2008, the Managing Director and Finance Director have made the following certifications to the Board:

- The Company's financial reports are complete and present a true and fair view, in all material respects, of the financial condition and operational results of the Company and are in accordance with relevant Accounting Standards.
- The above statement is founded on a sound system of risk management and internal compliance and control which implements the policies adopted by the Board and that the Company's risk management and internal compliance and control system is operating efficiently and effectively in all material respects.

4.4 Continuous Disclosure

The Board is committed to:

- the promotion of investor confidence by ensuring that trading in Company shares takes place in an efficient, competitive and informed market;
- complying with the Company's disclosure obligations under the ASX Listing Rules and the Corporations Act 2001; and
- ensuring the Company's stakeholders have the opportunity to access externally available information is sued by the Company.

The Company Secretary is responsible for coordinating the disclosure of information to Regulators and Shareholders,

and ensuring that any notifications/reports to the ASX are promptly posted on the Company's website. A copy of the Continuous Disclosure Policy is available from the Company's website.

4.5 Shareholder Communication

The Board has adopted a Communications Plan which describes the Board's policy for ensuring Shareholders and

potential investors of the Company receive or obtain access to information publicly released by the Company.

The Company's primary portals are its website, Annual Report, AGM, Half-Yearly Report, and monthly notices to the ASX.

The Company Secretary oversees and coordinates the distribution of all information by the Company to the ASX, Shareholders, the media and the public. A copy of the Communication Plan is available from the Company's website.

A copy of the Communication Plan is available from the Company's website.

4.6 Risk Assessment and Management

The Board, through the Audit Committee, is responsible for ensuring that:

- there are adequate policies for the oversight and management of material business risks to the Company.
- there are effective systems in place to identify, assess, monitor and manage the risks of the Company and to identify material changes to the Company's risk profile; and
- arrangements are adequate for monitoring compliance with laws and regulations applicable to the Company.

The Executive Directors have reported to the Board as to the effectiveness of the Company's management of its material business risks.

The appointed Investment Manager and Administrator, Platinum Asset Management, has implemented risk management and compliance frameworks based on AS/NZS 4360:2004 Risk Management Standard and AS 3806-2006 Compliance Programs. These frameworks (together with the firm's internal audit function) ensure that:

- emphasis is placed on maintaining a strong control environment;
- accountability and delegations of authority are clearly identified;
- risk profiles are in place and regularly reviewed and updated;
- timely and accurate reporting is provided to Management and respective Committees; and
- compliance with the law, contractual obligations and internal policies (including business rules of conduct) is communicated and demonstrated.

Platinum Asset Management reports periodically to the Audit Committee on the effectiveness of its risk management and compliance frameworks with respect to services undertaken for the Company.

A summary of the Company's and the Investment Manager's risk management practices is available from the Company's website.

4.7 Business Rules of Conduct

The appointed Investment Manager and Administrator, Platinum Asset Management, has established Business Rules of Conduct ("BROC") applicable to its Directors and staff.

It communicates the appropriate standards of behaviour, provides a framework for the workplace, and informs staff of their responsibilities

with respect to legal compliance, confidentiality and privacy, conflicts of interest, investment activities and operational processes. Compliance is monitored by the Compliance team. Regular training sessions are provided by the Compliance Manager.

All employees are asked to sign an annual declaration confirming their compliance with the BROC.

NOTES TO THE FINANCIAL STATEMENTS

30 June 2008

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

This general purpose financial report has been prepared in accordance with Australian Equivalents to International Financial Reporting Standards (AIFRS), other authoritative pronouncements of the Australian Accounting Standards Board, Urgent Issues Group Interpretations and the Corporations Act 2001.

(a) Basis of Preparation

The principal accounting policies adopted in the preparation of the financial report are set out below.

These policies have been consistently applied to all periods presented, unless otherwise stated.

These financial statements have been prepared under the historical cost convention, as modified by the revaluation of "financial assets held at fair value through profit or loss".

Compliance with IFRS

Australian Accounting Standards include Australian Equivalents to International Financial Reporting Standards (AIFRS). Compliance with AIFRS ensures that the financial statements of the Company, and notes thereto, comply with International Financial Reporting Standards (IFRS).

The preparation of the financial statements in conformity with AIFRS requires the use of certain critical accounting estimates and judgements, which are included below.

(b) Income Tax

The income tax expense or revenue for the period is the tax payable on the current period taxable income based on the current income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements, and to unused tax losses. Under AASB 112: Income Taxes, deferred tax balances are determined using the balance sheet method which calculates temporary differences based on the carrying amounts of an entity's assets and liabilities in the Balance Sheet and their associated tax bases.

(c) Financial Assets at Fair Value through Profit or Loss

Under AASB 139, investments are classified in the Balance Sheet as "financial assets held at fair value through profit or loss". These financial assets are initially recognised at fair value, typically represented by cost excluding transaction costs, which are expensed as incurred. Financial assets are measured at fair value and exclude transaction costs. Investment values are based on quoted "bid" prices on long securities and quoted "ask" prices on securities sold short.

Gains and losses arising from changes in the fair value of the financial assets are included in the Income Statement in the period in which they arise.

Fair value in an active market

The fair value of financial assets and liabilities traded in active markets is based on their quoted market prices at balance sheet date without any deduction for estimated future selling costs. Financial assets are priced at current bid prices, while financial liabilities are priced at current asking prices.

Fair value in an inactive or unquoted market

The fair value of financial assets and liabilities that are not traded in an active market is determined using valuation techniques.

These include the use of recent arm's length market transactions, reference to the current fair value of a substantially similar other instrument, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

(d) Transaction Costs

Initial measurement (cost) on acquisition of trading securities shall not include directly attributable transaction costs such as fees and commissions paid to agents. Incremental transaction costs are expensed as incurred in the Income Statement.

(e) Foreign Currency Translation

The functional and presentation currency of the Company as determined in accordance with AASB 121: The Effects of Changes in Foreign Exchange Rates will be the Australian dollar.

Transactions denominated in foreign currencies are translated into Australian currency at the rates of exchange prevailing on the date of the transaction. Foreign currency assets and liabilities existing at balance date are translated at exchange rates prevailing at balance date. Resulting exchange rate differences are brought to account in determining profit and loss for the year.

(f) Investment Income

Interest income

Interest income is recognised in the income statement using the effective interest method, which allocates income over the relevant period.

Dividend income

Dividend income is brought to account on the applicable ex-dividend date.

NOTES TO THE FINANCIAL STATEMENTS

30 June 2008

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(g) Directors' Entitlements

Liabilities for Directors' entitlements to fees are accrued at nominal amounts calculated on the basis of current fees rates.

Contributions to Directors' superannuation plans are charged as an expense as the contributions are paid or become payable.

(h) Earnings Per Share

Basic and diluted earnings per share is determined by dividing the profit after income tax by the weighted number of ordinary shares outstanding during the financial year.

(i) Cash and Cash Equivalents

For the purposes of the Cash Flow Statement, cash includes deposits at call and cash at bank, which are readily convertible to cash on hand.

Cash at the end of the financial year, as shown in the Cash Flow Statement, is reconciled to the related item in the Balance Sheet.

(j) Receivables

All receivables are recognised as and when they are due.

Debts which are known to be uncollectible are written off. A provision for doubtful debts is raised when there is evidence the amount will not be collected.

(k) Pavables

All payables and trade creditors are recognised as and when the Company becomes liable.

(I) Contributed Equity

Ordinary shares are classified as equity.

(m) Dividends

Provision is made for the amount of any dividend declared or determined by the Directors on or before the end of the financial year but not paid at balance date.

(n) Rounding of amounts

The Company is of a kind referred to in the Australian Securities & Investments Commission's Class Order 98/0100 (as amended) and consequently amounts in the financial report and financial statements have been rounded off to the nearest thousand dollars in accordance with that Class Order, unless otherwise indicated.

(o) Goods and Services Tax (GST)

Revenue, expenses and assets are recognised net of the amount of associated GST, unless the GST is not recoverable from the tax authority. In this case, it is recognised as part of the cost of the acquisition of the asset or has been expensed.

(p) New Accounting Standards and Interpretations

Certain new accounting standards and interpretations have been published that are not mandatory for the 30 June 2008 reporting period. Our assessment of the impact of these new standards and interpretations is set out below:

(i) AASB 101: Presentation of Financial Statements and AASB 2007-8 Amendments to Australian Accounting Standards (AASB 101)

The revised AASB 101 was issued in September 2007 and is applicable for annual reporting periods beginning on or after 1 January 2009. It requires the presentation of a statement of comprehensive income and makes changes to the statement of comprehensive income and to the statement of changes in equity, but will not affect any of the amounts recognised in the financial statements. If the Company has made prior period adjustments or reclassified items in the financial statements, it will need to disclose a third balance sheet (Statement of Financial Position), as at the beginning of the comparative period.

The Company intends to apply the revised standard from 1 July 2009.

(ii) AASB 8: Operating Segments and AASB 2007-3 Amendments to Australian Accounting Standards (AASB 107 & AASB 134)

AASB 8 and AASB 2007-3 are applicable to annual reporting periods beginning on or after 1 January 2009. AASB 8 requires the adoption of a "management approach" to disclosing information about its reportable segments. Generally, the financial information will be reported on the same basis as is used internally by the chief decision maker for evaluating operating segment performance and deciding how to allocate resources to operating segments. The amendments may have an impact on the Company segment disclosures. However, the amendment will not affect any of the amounts recognised in the Company's financial statements. The Company has not adopted this standard early.

Shares are issued under the Dividend Reinvestment Plan at a 5% discount to the market price. For reinvestment of unclaimed dividends, additional shares are issued at the last sale price of the Company's shares on the first business day following the expiration six months from the date of payment of the relevant dividend.

Ordinary Shares
Ordinary Shares entitle the holder to participate in dividends and the proceeds on winding up of the Company in proportion to the number of and amounts paid on the shares held.

7. Earnings per share	2008	2007
Basic earnings per share - cents per share	(19.00)	7.42
Diluted earnings per share - cents per share	(19.00)	7.42
Weighted average number of Ordinary Shares on issue used in the calculation of basic and diluted earnings per share	125,601,279	122,836,450
	\$'000	\$'000
Earnings used in the calculation of basic and diluted earnings per share	(23,861)	9,111

As there are no potential Ordinary Shares, diluted earnings per share equals basic earnings per share.

Less: Deferred Income tax asset on revaluation of investments not recognised in Net Asset Value Deferred income tax asset on movements on AIFRS and last sale price Net Asset Value	, , ,	203,730

^{**}Includes \$8,102,000 (2007: \$9,457,000) on deposit to 'cash cover' derivative contracts' deposits and margin calls. These amounts are held by the relevant derivative exchanges and counterparties as security and are not available for use by the Company until the derivative contracts are closed out. If losses are realised on the close out of derivative contracts, the cash balances are set off against those losses.

If profits are realised on the close out of derivative contracts, the money is returned to the Company.

NOTES TO THE FINANCIAL STATEMENTS continuec 30 June 2008

12. Financial Risk Management

(a) Financial Risk Management Objectives, Policies and Processes

The Company's primary risks are related to the investment activities undertaken on its behalf by the Investment Manager. The risks the Investment Manager is exposed to include market risk (including currency and price risk), credit risk and liquidity risk.

The Investment Manager's investment style:

- (i) adopts a bottom-up, stock selection methodology in which long-term capital growth is sought through investing in undervalued securities across the world;
- (ii) seeks absolute returns and not returns relative to any index;
- (iii) utilises short selling of shares and indices;
- (iv) invests excess funds in cash when undervalued stocks cannot be found; and
- (v) actively manages currency.

Derivatives (which include futures and shorts) are utilised for risk management purposes and to take opportunities to increase returns. However, the underlying value of derivatives held by the Company may not exceed 100% of the net asset value. The underlying value of long stocks and derivative contracts may not exceed 150% of the portfolio value.

30 June 2008

12. Financial Risk Management (continued)

(b) Investments at Fair Value and Derivative Exposure

	2008		2007

Total	157,970	157,970	212,851	212,851	

The "Physical" column shows the location of the Company's investments.

The "Net Exposure" represents an approximation of the Investment Portfolio's exposure to movements in markets. This is calculated by making an adjustment to the "Physical" position, by subtracting, from the physical position, the principal notional amount of any short (sold) and add any long (bought) derivative positions in shares or share index futures. For example, if 5% of the Portfolio was invested in Japan but there was a 2% short position in Nikkei futures, then the net exposure column would show 3%. Conceivably the figure could show a negative exposure which would indicate the Portfolio was net short the Japanese market.

(c) Market Risk

(i) Foreign Exchange Risk

Foreign exchange risk is the risk that fair values or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Company operates internationally and is exposed to foreign exchange risk arising from buying, selling and holding investments denominated in foreign currency. The Investment Manager selects stocks based on value regardless of geographic location.

Currency hedging is an integral part of the management of currency risk. The Investment Manager may position the Company's Portfolio in what it believes will be a stronger currency(ies). At 30 June 2008, the Company's principal currency exposure was the US Dollar (25%).

The Investment Manager may use forward foreign exchange contracts, and futures and option contracts on foreign exchange rate contracts, to position the Portfolio in the desired currencies. A currency exposure may be hedged into a different currency from which the exposure is maintained (for example, US Dollar hedges may be used to hedge the currency risk of holding investments in Hong Kong Dollars).

Where there have been major currency movements, or where currencies are perceived to be over or undervalued, the Investment Manager may look for investments whose operating environment has been distorted by the currency as part of the search for undervalued stocks. There may be even opportunities to invest in stocks impacted by a lower currency (for example, export-oriented stocks).

30 June 2008

12. Financial Risk Management (continued)

(i) Foreign Exchange Risk (continued)

The table below summarises the Company's investment exposure at fair value to foreign exchange risk:

	2008

Forward foreign currency contracts and options on forward currency contracts are adjusted against the

The Company generally utilises short dated (90 day maturities) currency agreements with high-credit rated counterparties. The existing forward currency contract positions' maturity dates range from 15 days to 75 days.

Foreign exchange risk sensitivity analysis

At 30 June 2008, had the Australian Dollar weakened/strengthened by 10% against the Japanese Yen with all other variables held constant, net profit would have been A\$3,889,477/A\$3,271,991 higher/lower (2007: A\$5,808,478/A\$5,326,494 higher/lower). Similarly, had the Australian Dollar weakened/strengthened by 10% against the US Dollar with all other variables held constant, net profit would have been A\$4,714,869/A\$2,180,496 higher/lower (2007:A\$3,242,933/A\$853,449 higher/lower).

The sensitivity analysis is based on the impact of foreign currency movements on monetary assets and liabilities, held at reporting date, such as cash and forward contracts, as well as non-monetary assets, such as equities.

The sensitivity analysis shows that the Company is materially affected by exchange rate movements (other things being equal) given the global nature of the investments held.

During 2007/2008, the Australian Dollar remained strong against various major currencies, and because we were underweight in the Australian Dollar, this impacted adversely on the Company's return.

(ii) Interest Rate Risk

Interest rate risk is the possibility that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The overwhelming majority of the Company's financial assets and liabilities are non-interest bearing as the Company has a policy of not borrowing, other than for settlement of trades.

Interest rate movements will affect forward points used in determining gains or losses on forward contracts.

This is not capable of precise estimation. The impact of interest rate movements on our investments is also not capable of precise estimation.

At 30 June 2008 and 2007, if interest rates had changed by -/+ 100 basis points with all other variables held constant, the direct impact on interest receivable would not be significant for the Company.

[&]quot;physical" column to arrive at a net exposure to each currency grouping.

30 June 2008

12. Financial Risk Management (continued)

(iii) Price Risk

As nearly all of the non-monetary investments held by the Company are denominated in currencies other than the Australian Dollar, market prices fluctuate because of a range of factos specific to the individual investments or its issuer, or factors affecting the market in general. (Prices will also fluctuate on the basis of exchange rate movements as discussed above).

Platinum's stock selection process is core to the management of risk. Platinum adopts a thematic stock selection approach and is referred to as being an "active manager". The Investment Manager seeks a broad range of investments whose businesses and growth prospects are being undervalued by the market. Accordingly, holdings in the Company vary considerably from the make-up of the index. Investment Managers such as Platinum Asset Management seek to out perform the market as represented by an appropriate index.

An additional risk management tool is that the Company may enter into short positions to protect against market movements. At 30 June 2008, the Company maintained short positions against various indices, such as the German DAX index and the Indian Nifty index. This allowed the Company to invest in particular companies in those markets whilst providing some degree of protection against more general adverse market price movements.

At 30 June 2008, the Company was 30% short individual shares and index futures.

Price risk sensitivity analysis

Price risk exposure arises from the Company's investment portfolio which comprises investments in listed and unlisted securities. The effect on profit due to a possible change in market factors, as represented

by a -/+ 5% movement in key regional equity indices affecting the market (and stocks) that the Company predominantly invests in, with all other variables held constant, is indicated as follows:

At 30 June 2008 if the United States S&P index had increased/decreased by 5% with all other variables held constant, this would have increased/decreased profit of the Company by approximately \$1,563,136 (2007: \$2,405,092). Similarly, if the Japanese Nikkei 225 index had increased/decreased by 5% with all other variables held constant, this would have increased/decreased profit of the Company by approximately \$1,462,216 (2007: \$2,581,569).

The above analysis is based on the assumption the Company stocks move in correlation with this index.

The indices provided above are a reference points only. Actual movements in stock prices may vary significantly to movements in the index.

The above sensitivity analysis for price risk is unrepresentative of the market exposure for the Company because the Investment Manager does not invest by reference to the weighting or inclusion of a stock in specific index. An investment management style where the composition of the portfolio is by reference to global share index weightings are often referred to as "index managers". Index fund managers try to match a particular index by investing in securities that are representative of that index.

(d) Credit Risk

Credit risk measures total counterparty exposure for all counterparties that deal with "non-equity" financial instruments with Platinum. Equities are fully owned by the Investment Manager and there is no risk of default by a counterparty.

For management reporting purposes, the exposure to credit risk for futures, shorts, and forward currency contracts is any unrealised profit on the positions (the money the Company would lose if the counterparty defaulted) at reporting date. For cash, margins, warrants and options, the exposure to credit risk is the full market value of the investment at reporting date.

30 June 2008

12. Financial Risk Management (continued)

(d) Credit Risk (continued)

The table below shows the Company's counterparty credit risk exposure by credit ratings

Ratings

	2008 \$'000	2007 \$'000

A-1+		2,751
Total description	22,269	22,385

Source: Platinum and Standard & Poor's

The Company implements the following procedures in order to manage its exposure to credit risk:

- (i) the Investment Manager only approves counterparties after an assessment of their credit standing. Only counterparties/brokers with high credit ratings are engaged;
- (ii) maximum exposure limits are established for each counterparty, to ensure that credit risk is spread amongst a number of counterparties to minimise the risk of default.;
- (iii) independent monitoring is undertaken of exposure to counterparties;
- (iv) legal agreements are entered into for each counterparty;
- (v) legal documentation is securely held, independently of the persons responsible with implementing

Platinum's investment process; and

(vi) the credit positions of the Company are monitored on a daily basis.

Transactions in listed securities and investments generally, are only entered into with approved brokers.

Payment is only made once a broker has received securities and delivery of securities sold only occurs once the broker receives payment. No collateral is held as security or are any other credit enhancements.

Ageing analysis

The Company's ageing analysis of receivable at 30 June 2008 is \$287,769 (0-30 days), \$16,773 (31-60 days), \$15,892 (61-90 days), \$2,501,276 (90+ days). Amounts greater than 61 days are overdue but none are considered to be impaired.

(e) Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities. This includes the risk that the Company:

- (i) will not have sufficient funds to settle a transaction on the due date; and
- (ii) will be forced to sell financial assets at a value which is less than they are worth.

As at 30 June 2008, the contractual maturity for amounts payable within three months for unsettled trades is \$1,141 (2007: \$638,078), for other payables including trade creditors and dividends payable is \$641,024 (2007: \$772,989). The Company has sufficient funds to meet these liabilities as the value of assets realisable in one year or less is \$164,136,000 (2007: \$213,606,000).

As at 30 June 2008, contractual maturity for settlement of derivative contracts is \$nil for amounts payable within one month (2007: \$31,629), \$nil for amounts payable greater than one month but less than three months (2007: \$182,662), \$24,525 for amounts payable between three and twelve months (2007: \$182,006) and \$nil for amounts payable greater than one year but less than five years (2007: \$123,984).

(f) Fair Value Estimation

Please refer to Note 1 (c).

(g) Capital Risk Management

The Company considers its capital to comprise ordinary share capital and accumulated retained earnings.

The Company's objective is to seek long-term capital growth by investing in undervalued securities across the world, so to continue to provide returns to shareholders. The Directors have a policy of smoothing dividend payments over time, but this is subject to the return over time from the investment portfolio.

The Company is an ASX-listed investment company and is subject to various Listing Rule requirements. For example, the Company must report its net asset value to the ASX on a monthly basis.

15. Investment Manager

The Investment Manager Platinum Investment Management Limited receives a monthly Management fee for investment services provided in accordance with the Investment Management Agreement. This Agreement provides for a Management fee payable monthly and calculated at 1.5% per annum of the Portfolio Value (which includes cash and deposits).

A Performance fee is payable at 10% of the amount by which the Portfolio's annual performance exceeds the return achieved by the MSCI plus 5% (MSCI is the Morgan Stanley Capital International All Country World Net Index in A\$). Where the Portfolio's annual performance is less than the MSCI, the amount of the underperformance is aggregated, carried forward and deducted from the annual performance in the subsequent year before calculating any Performance fee for that year. The aggregate of underperformance is carried forward until a Performance fee becomes payable.

The pre-tax performance of the Portfolio for the year to June 2008 was negative 15.97% and the corresponding MSCI's performance was negative 19.79%. Even though there is an outperformance of 3.82% against the MSCI there is a brought forward net underperformance amount of 4.50%. This does not represent an outperformance after the 5% MSCI hurdle.

Accordingly a Performance fee is not payable.

The Investment Manager is to be paid a lump sum termination fee of 1.5%, calculated on the value of the Portfolio on the first day of the month in which termination is effective. The fee is not payable if the termination results from the default or insolvency of the Investment Manager. Additionally, a Performance fee is payable for the period from the last calculation of the Performance fee (as described above) to the date of termination.

Amounts paid and payable to the Investment Manager for the year	2,888	3,237

	\$'000	\$'000
	2008	2007

30 June 2008

15. Investment Manager (continued)

A summary of the salient provisions of the Investment Management Agreement ("Agreement") is contained below:

- (a) The terms of the Agreement require the Investment Manager to:
- (i) invest and manage the Portfolio in accordance with the Agreement;
- (ii) confer with the Board of the Company at regular intervals in respect of the investment and management of the Portfolio;
- (iii) exercise all due diligence and vigilance in carrying out its functions, powers and duties under the Agreement;
- (iv) promptly notify the Board of any instructions given to it by the Company which have not been complied with; and
- (v) appoint Mr Neilson as Managing Director of the Company.
- (b) Each party is to provide three months notice to terminate the Agreement. The Company, however, may immediately terminate the Agreement where the Investment Manager:
- (i) becomes subject to a receiver, receiver and manager, administrative receiver or similar person;
- (ii) goes into liquidation;
- (iii) ceases to carry on business in relation to its activities as an Investment Manager;
- (iv) breaches a material provision of the Agreement, or fails to observe or perform any representation, warranty or undertaking given by the Investment Manager under the Agreement; or
- (v) sells or transfers or makes any agreement for the sale or transfer of the main business and undertaking of the Investment Manager or beneficial interest therein, other than to a related body corporate for purposes of corporate reconstruction on terms previously approved in writing by the Company.

The Agreement was entered into to (a) codify changes made to the ASX Listing Rules over the past few years and (b) codify the range of services provided by the Investment Manager to the Company.

16. Contingent Assets, Liabilities and Commitments for Expenditure

No contingent assets or liabilities exist at balance date.

The Company has no commitments for uncalled share capital on investments.

30 June 2008

17. Segment Information

The Company operates solely in Australia.

While the Company only operates in Australia (the geographical segment), it has investment exposures in different countries.

The geographical locations of those exposures are outlined below.

Independent auditor's report to the members of Platinum Capital Limited

Report on the financial report

We have audited the accompanying financial report of Platinum Capital Limited, which comprises the balance sheet as at 30 June 2008, and the income statement, statement of changes in equity and cash flow statement for the year ended on that date, a summary of significant accounting policies, other explanatory notes and the directors' declaration for Platinum Capital Limited.

Directors' responsibility for the financial report

The directors of the company are responsible for the preparation and fair presentation of the financial report in accordance with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Act 2001*. This responsibility includes establishing and maintaining internal controls relevant to the preparation and fair presentation of the financial report that is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances. In Note 1, the directors also state, in accordance with Accounting Standard AASB 101 *Presentation of Financial Statements*, that compliance with the Australian equivalents to International Financial Reporting Standards ensures that the financial report, comprising the financial statements and notes, complies with International Financial Reporting Standards.

Auditor's responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

Our procedures include reading the other information in the Annual Report to determine whether it contains any material inconsistencies with the financial report.

For further explanation of an audit, visit our website http://www.pwc.com/au/financialstatementaudit

Our audit did not involve an analysis of the prudence of business decisions made by directors or management.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Independence

In conducting our audit, we have complied with the independence requirements of the Corporations Act 2001.

Independent auditor's report (continued)

Auditor's opinion

In our opinion:

- (a) the financial report of Platinum Capital Limited is in accordance with the Corporations Act 2001, including:
 - (i) giving a true and fair view of the company's financial position as at 30 June 2008 and of its performance for the year ended on that date; and
 - (ii) complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Regulations 2001*; and
- (b) the financial report also complies with International Financial Reporting Standards as disclosed in Note 1.

Report on the Remuneration Report

We have audited the Remuneration Report included in pages 6 to 7 of the directors' report for the year ended 30 June 2008. The directors of the company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.

Auditor's opinion

In our opinion, the Remuneration Report of Platinum Capital Limited for the year ended 30 June 2008, complies with section 300A of the *Corporations Act 2001*.

Matters relating to the electronic presentation of the audited financial report

This auditor's report relates to the financial report and remuneration report of Platinum Capital Limited (the company) for the year ended 30 June 2008 included on Platinum Capital Limited's web site. The company's directors are responsible for the integrity of the Platinum Capital Limited's web site. We have not been engaged to report on the integrity of this web site. The auditor's report refers only to the financial report and remuneration report named above. It does not provide an opinion on any other information which may have been hyperlinked to/from these statements or the remuneration report. If users of this report are concerned with the inherent risks arising from electronic data communications they are advised to refer to the hard copy of the audited financial report and remuneration report presented on this web site.
