ASX Market Announcements
Australian Securities Exchange Limited
Sydney NSW 2000

Monthly Net Tangible Asset Update

The unaudited **pre-tax** net tangible asset (**pre-tax NTA**) backing per share of Platinum Asia Investments Limited (**PAI**) as at 31 May 2022 was \$1.0135 per share (as at 30 April 2022 it was \$1.0384).

The unaudited **post-tax** net tangible asset (**post-tax NTA**) backing per share of PAI as at 31 May 2022 was \$1.0453 per share (as at 30 April 2022 it was \$1.0622).

The pre-tax NTA was calculated in accordance with Australian Accounting Standards, based on the fair value of all investments. The post-tax NTA is the pre-tax NTA after provision for tax on **both** realised and unrealised income and gains.

At 31 May 2022, the PAI share price was \$0.855.

The 31 May 2022 monthly update is attached to this announcement. For more information in relation to PAI please refer to the website at:

MARKET UPDATE AND COMMENTARY

- Asia basically flat over the month of May.
- China stimulus measures continue, to little effect amid lockdowns.
- An mRNA vaccine is under development in China.

May saw another month of relative stability in Asian markets.

Contributors to the portfolio's performance for the month included several of our short positions including an Indian tech outsourcing firm, and the Hong Kong and Korean country indices. Our long position in Korean battery and petrochemical giant LG Chem also contributed to performance. Detractors for the month included many of the largest and highest-quality companies in Asia, including Tencent, Taiwan Semiconductor Manufacturing and SK Hynix, perhaps indicative of ongoing selling by foreigners across Asia.

China stimulus continues

China is clearly attempting to stimulate its economy. This is apparent in data such as the 'credit impulse': credit growth less nominal GDP, with positive readings indicating increased debt to GDP (please see accompanying chart). May saw further stimulus measures such as tax cuts, loosening of vehicle sales quotas (many Chinese cities restrict the number of cars sold each year) and an acceleration of infrastructure spending (Source: Reuters).

China has been seeking to stimulate its economy since at least November last year, as we have mentioned in previous monthly commentaries. This is unlikely to have any pronounced effect in the presence of ongoing lockdowns, in our view. However, China's zero-Covid policy is unlikely to last forever.

A Chinese mRNA vaccine is in development

China has been developing an mRNA vaccine since March 2020. During the month, investment team members attended a virtual conference at which the CEO of Everest Biotech and the founder of CanSinoBIO spoke. We would summarise their comments as follows: progress on an mRNA vaccine is being made; there is likely to be several months to go before an mRNA vaccine is available in China; further, sufficient capacity to manufacture at the scale required to roll out a vaccine across China would take several months more; however, by late this year, there could be an mRNA vaccine available in China.

Vice-Premier Liu He, Xi Jinping's most senior economic advisor, made comments supportive of China's tech giants following a symposium with the management of many of China's tech giants. This marks another small step in the months-long thawing of relations with China's tech sector, including public recognition by Chinese officials of the importance of China's tech firms to its economy.

What appears to be building in China is similar to a coiled spring in our view: ongoing economic stimulus; a turning of the credit cycle; and an improving regulatory environment for large, listed firms. This is in marked contrast to the situation in many markets, notably the US, where enormous stimulus measures are being withdrawn, monetary policy tightened and quantitative easing reversed.

What is lacking is a relaxation of China's restrictive policy in regards to Covid given its hitherto failed response to the disease. News of successful vaccine development in Western markets was a major catalyst for improved performance in the wake of the Covid sell-off of 2020. We see no reason why news of a successful mRNA vaccine in China would not have a similar effect, with potentially significant outcomes for China, the region, and indeed, cyclical equities globally.
