1. Performance results have been calculated using the pre-tax net asset value price (as released to the ASX) and represent the combined income and capital return of the investments for the specified period. Please note that the results are not calculated from the share price of Platinum Asia Investment Limited (PAI). You should also be aware that performance results are calculated using historic points of reference. PAI cannot guarantee that such results will be replicated in the future; therefore, this information should not be used to make future investment decisions.

2. The investment returns depicted in this graph are cumulative on A\$20,000 invested in PAI since inception relative to the MSCI All Country Asia ex Japan Net Index in A\$. Performance results have been calculated using the pre-tax net asset value (NAV) price as released to the ASX (monthly 'Net Asset Values') and represent the combined income and capital return of PAI's investments for the specified period. Please note that the results are not calculated from the share price of PAI. It should be noted that Platinum does not invest by reference to the weightings of the Index. Underlying assets are chosen through Platinum's individual stock selection process and as a result holdings will vary considerably to the make-up of the Index. The Index is provided as a reference only.

3. The "Long %" represents the exposure of physical holdings and long stock derivatives. The "Net %" represents the exposure of physical holdings and both long and short derivatives. The "Currency %" represents the currency exposure for the Company's Portfolio, taking into account currency hedging.

4. Top Ten positions shows PAI's top long share exposure positions. Long derivative exposures are included, however, short derivative exposures are not.
