1. & 2. Source: Platinum for portfolio returns and Factset Research Systems for MSCI returns. The returns are calculated relative to the MSCI All Country World Net Index in A\$ (except the gross MSCI Index was used prior to 31/12/98). The investment returns in the line graph are cumulative on A\$20,000 invested in PMC since inception. **Past performance is not a reliable indicator of future returns.** Platinum does not invest by reference to the weightings of the index. The index is provided as a reference only.

3. The "Long %" is the exposure to long securities and long securities/index derivative positions, the "Short %" is the exposure to short securities and short securities/index derivative positions and the "Net %" is the exposure to long and short securities and long and short securities/index derivative positions, each as a percentage of PMC's portfolio value. The "Currency %" is the effective currency exposure of PMC's portfolio as a percentage of its portfolio value, taking into account long and short securities, cash, forwards and long and short securities/index derivative positions. For the "Industry breakdown", index positions (whether through ETFs or derivatives) are only included under the relevant sector if they are sector specific, otherwise they are included under "Other".

3. and 4. Country classifications for securities reflect Bloomberg's "country of risk" designations, and currency classifications for securities reflect the relevant local currencies of our country classifications.

4. The "Top ten positions" show PMC's top ten long securities positions as a percentage of PMC's portfolio value (including long securities and long securities derivative positions).

## MARKET UPDATE AND COMMENTARY

- Difficult month for the portfolio, driven by market response to the Russia-Ukraine conflict.
- Prior to the conflict, we saw encouraging “preview” of our base-case playing out.
- Strong long-term themes underpin portfolio, while short book exposed to deflation of “bubble”.

### Market Commentary

Understandably, the Russia-Ukraine conflict dominated global markets in March. Notwithstanding the dreadful human cost, key impacts are being felt via supply disruptions and higher prices for energy and food. Longer term, regardless of resolution, Russia will be seen as a “pariah”. In our view, driven by Western commentators, the market is too negative on China’s independent view of the conflict. China is deeply integrated in, and benefits from, the global economic system; it should not jeopardise this. We should all accept that having two superpowers with differing ideologies, each trying to assert themselves, leads to various tensions.

The conflict is denting confidence in Europe, and China has a double-whammy of reform policies and a COVID outbreak, but the US economy appears immune at this stage. In recent weeks, this has impacted economically sensitive companies, albeit commodity companies have benefited from higher prices. More surprising perhaps, in light of US interest rate expectations exploding higher, has been a strong rebound in the back half of March for companies that benefit from lower rates (e.g. one might view the technology-heavy Nasdaq index as a proxy for this).

Perhaps the uncertainty caused by war and Chinese slowdown pushed people back to their “safety playbook” but we struggle with this behaviour given market bifurcation is at extremes. We think liquidity tightening means the ‘disruption-driven’ bull market is running out of steam. Immediately before the Ukraine situation, the benefits of reopening and stimulus aided the economically sensitive stocks, while interest rate pressure was impacting the highly valued technology stocks.

Many economically sensitive companies are trading on crisis-level valuations, while previous experience tells us bull markets can end slowly - it takes time for the dominant narrative to crack. Exposures to decarbonisation, travel, semiconductors, healthcare, Chinese consumers and well-priced financials dominate the portfolio.

### Performance Analysis\*

The backdrop for Q1 2022, was a global market decline of 8%, with cyclicals (ex-resources) and IT suffering the most. With this headwind, the long portfolio, cost 7%. IT/Communications, Industrials, Financials and Consumer Discretionary holdings, being economically sensitive, were weakest. We saw good outcomes in Materials, and Chinese Property with leading contributors on the long side: Mosaic, Glencore, Barrick Gold, First Quantum and Bayer (all exposed to rising commodity prices – Bayer tangentially through seeds) and China Overseas Land (property). The short book was a small cushion, contributing 1%, but had added over 3% in January and February, before a late March rally in expensive growth names, which we found hard to reconcile with fundamentals.

### Valuation

The portfolio’s aggregate valuation metrics are attractive in both an absolute sense and relative to the market, with a 60% higher starting earnings yield and a 44% discount on an asset basis (see table below).

Metric	Platinum Capital Limited	MSCI AC World Net Index (A\$)
NTM Earnings Yield	9.6% (Price-to-Earnings ratio of 10x)	6.0% (Price-to-Earnings ratio of 17x)
NTM Dividend Yield	3.2%	2.5%
Price-to-Book Ratio	1.5x	2.7x
Enterprise Value-to-Sales	1.3x	1.9x

The valuations in the table in respect of the portfolio have been calculated by Platinum and refer to the long portion of the portfolio, exclude negative net earnings and use FactSet consensus earnings. As at 31 March 2022.

\*Source: Platinum. Contribution numbers are based on the total return of individual positions (in AUD) and are gross as they do not take into account the portfolio’s fees and costs (other than brokerage). Past performance is not a reliable indicator of future returns.
